Now first part is just create two or three domain users in active directory users and computers as below.

Note: This is just create users only the main difference is that in Exchange 2003 creating a user in domain will ask wants to create mail box for that user. Now in Exchange 2007 and in 2010 this process is a different tasks. Will tell you more detail in later.

After that open Exchange Management Console. Your Exchange Server will be as follow.
