

Exemplars of Curriculum Theory

Arthur Kellis

There are several definitions of curriculum. The term is of Latin origin which means running a course. The Oxford English Dictionary defined it as a course specifically a regular course of study or training, as at a school or university but in reality the word may refer to various concepts based on context and perspective.

Curriculum can be prescriptive which contains planned programs or expert recommendations. Several curricularists across times defined curriculum prescriptively. Franklin Bobbitt (1918) viewed curriculum as a series of experiences to prepare individuals for adult life. Hilda Taba (1962) considered curriculum as a plan for learning. Donald Cay (1966) believed that it is a master plan created by educators and members of the community. Peter Oliva (1997) saw the curriculum as a plan of learning experiences in school. Alan Block (1998) described curriculum as a body of knowledge and methods for communication.

The Progressive Paradigm

A progressive curriculum focuses on the quality of experiences and processes that foster growth and development rather than solely focusing on content and skills acquisition. In a progressive curriculum, the teacher is a facilitator of learning, to guide and not to direct, listen and not tell. Jean Dewey argued that quality education occurs when the teacher turns into a learner and the learners become teachers.

In terms of emphasis, a progressive curriculum is experiential and process focus, employs integrated studies approach, focuses on learner interest, and has real-world emphases. Meanwhile, teaching uses indirect instruction and also makes use of peer teaching and mentoring. Learning, on the other hand, is student-initiated and directed, makes use of cooperative group learning, and is inquiry and discovery-led. In terms of assessment, it is formative, authentic and performance-based, and most of the time anecdotal.

The Learner-Centered Curriculum

The learner-centered curriculum is also sometimes known as the child-centered or the student-centered curriculum. Its ideas and energy are derived from progressive theory. It emphasizes what John Dewey and others have called incidental education and collateral learning which means that things happen along the way or that things happen spontaneously. It has been used at all ages and levels including post-high school yet pioneers of the model are more interested in early childhood education and the pre-teen years of school.
