

# **EXERCISES IN ARCHITECTURE**

## ***learning to think as an architect***

Architecture is a doing word. You can learn a great deal about the workings of architecture through analysing examples but a fuller understanding of its powers and potential comes through practice, by trying to do it. As you learn a language you need to practise using it; and as you practise you learn more about what you can do with the language. It is the same with architecture...

This book offers student architects a series of twelve exercises that will develop their capacity for doing architecture. Each exercise is divided into a short series of tasks aimed at developing a particular theme or area of architectural capacity, providing prompts for practice. The exercises deal with themes such as place-making, learning through drawing, framing, light, uses of geometry, stage-setting, the genetics of detail and many more.

*Exercises in Architecture* builds on and supplements the methodology for architectural analysis presented in the author's previous book *Analysing Architecture* (third edition, Routledge, 2009) and demonstrated in his *Twenty Buildings Every Architect Should Understand* (Routledge, 2010). Together, the three books deal with the three aspects of acquiring any creative discipline: *Analysing*

## **Exercises In Architecture Learning To Think As An Architect:**

**Exercises in Architecture** Simon Unwin, 2022-08-01 This revised edition of *Exercises in Architecture Learning to Think as an Architect* is full of new content building on the success of the previous edition. All the original exercises have been revised and new ones added with the format changing to allow the inclusion of more supplementary material. The aim remains the same to help pre or early course architecture students begin and develop their ability to think as architects. Learning to do architecture is tricky. It involves awakening abilities that remain dormant in most people. It is like learning language for the first time a task made more mystifying by the fact that architecture deals not in words but in places places to stand to walk to sit to hide to sleep to cook to eat to work to play to worship. This book was written for those who want to be architects. It suggests a basis for early experiences in a school of architecture but it could also be used in secondary schools and colleges or as self directed preparation for students in the months before entering professional education. *Exercises in Architecture* builds on and supplements the methodology for architectural analysis presented in the author's previous book *Analysing Architecture the Universal Language of Place Making* fifth edition 2021 and demonstrated in his *Twenty Five Buildings Every Architect Should Understand* Routledge 2015. Together the three books deal with the three aspects of learning any creative discipline. 1 *Analysing Architecture* provides a methodology for analysis that develops an understanding of the way architecture works. 2 *Twenty Five Buildings* explores and extends that methodology through analysis of examples as case studies and 3 *Exercises in Architecture* offers a way of expanding understanding and developing fluency by following a range of rudimentary and more sophisticated exercises. Those who wish to become professional architects wherever in the world they might be must make a conscious effort to learn the universal language of architecture as place making to explore its powers and how they might be used. The exercises in this book are designed to help.

*Twenty-Five+ Buildings Every Architect Should Understand* Simon Unwin, 2023-11-03 The underlying theme of *Twenty Five Buildings Every Architect Should Understand* is the relationship of architecture to the human being how it frames our lives and orchestrates our experience how it can help us make sense of the world and contribute to our sense of identity and place. Exploring these dimensions through a wide range of case studies that illustrate the rich diversity of twentieth and twenty first century architecture this book is essential reading for every architect. With the addition of numerous shorter analyses this new edition covers an even greater range of architectural ideas providing students and architects with further inspiration for exploration in their own design work. Architects live by ideas. But where do they come from? And how do they shape buildings? There is no one right way to do architecture. This book illustrates many. Its aim is to explore the rich diversity of architectural creativity by analysing a wide range of examples to extract the ideas behind them. *Twenty Five Buildings Every Architect Should Understand* is a companion to Simon Unwin's *Analysing Architecture the Universal Language of Place Making* most recent edition 2021 and part of the trilogy which also includes his *Exercises in Architecture Learning to Think*

as an Architect second edition 2022 Together the three books offer an introduction to the workings of architecture providing for the three aspects of learning theory examples and practice Twenty Five Buildings focusses on analysing examples using the methodology offered by Analysing Architecture which operates primarily through the medium of drawing An underlying theme of Twenty Five Buildings Every Architect Should Understand is the relationship of architecture to the human being how it frames our lives and orchestrates our experiences how it can help us give form to the world and contributes to our senses of identity and place Exploring these dimensions through case studies that illustrate the rich diversity of twentieth and twenty first century architecture this book is essential reading and hopefully an inspiration for every architect In this new edition supplementary analysis and discussion has been added to each of the twenty five case studies drawing attention to their influences from and on other architects A number of extra shorter analyses have been included too following the practice of presenting extra small dishes interspersed among main courses in high end restaurants These additional short analyses account for the sign after Twenty Five in the title of this edition and double the number of buildings analysed to around fifty

What Student Architects Should Do Simon Unwin, 2025-06-02 As a first year student the challenges of learning how to do architecture can be daunting Though not prescribing a particular way there are as many ways to do architecture as there are architects this Notebook outlines what you should do to cultivate your own distinctive capacity for architectural design Architecture is a rich and varied subject a multifaceted and multidimensional skill Learning to do it is not easy It has many subtleties Becoming fluent can take many years Informed by decades of discussing architecture and its challenges with students this Notebook will help you lay foundations for a rewarding career as a creative architect All Simon Unwin s books explore architecture not just as a matter of form and space but in terms of its primal driving force the universal need and desire to make places for life Each of these Analysing Architecture Notebooks is devoted to a particular theme in understanding the rich and varied workings of architecture They can be thought of as addenda to the foundation volume Analysing Architecture the Universal Language of Place Making which first appeared in 1997 and has subsequently been enlarged in four further editions Examining these extra themes as a series of Notebooks rather than as additional chapters in future editions allows greater space for more detailed exploration of a wider variety of examples whilst avoiding the risk of the original book becoming unwieldy

Twenty-Five Buildings Every Architect Should Understand Simon Unwin, 2014-11-17 Twenty Five Buildings Every Architect Should Understand is an essential companion to Simon Unwin s Analysing Architecture and part of the trilogy which also includes his Exercises in Architecture Learning to Think as an Architect Together the three books offer an introduction to the workings of architecture providing for the three aspects of learning theory examples and practice Twenty Five Buildings focusses on analysing examples using the methodology offered by Analysing Architecture which operates primarily through the medium of drawing In this second edition five further buildings have been added to the original twenty from an even wider geographical area which now includes the USA France
