**Experiments with Life Itself** Francisco González de Canales, 2012 Every book relating the history of modern architecture features a large number of pages dedicated to avant garde designs and the formation of the modern movement in the interwar years and a similar number devoted to reconstruction and expansion after the Second World War Meanwhile as if owing to lack of understanding or convenient silence there is void of dark years of wars exile and misfortune about which little can be said However it was in these dark times as in so many other revealing moments in the history of culture that experimental and profoundly invigorating experiences were taking place Architects and artists voluntarily or forcibly driven to the margins of social importance began to react to a culturally unsustainable situation of which we know very little even today In *Experiments with Life Itself* Francisco Gonzalez de Canales studies a series of unrelated cases from the late 1930s to the late 1950s that he refers to as domestic self experimentation *Experiments with Life Itself* Francisco Gonzalez de Canales, 2013-01-15 Every book relating the history of modern architecture features a large number of pages dedicated to avant garde designs and the formation of the modern movement in the interwar years and a similar number devoted to reconstruction and expansion after the Second World War Meanwhile as if owing to lack of understanding or convenient silence there is void of dark years of wars exile and misfortune about which little can be said However it was in these dark times as in so many other revealing moments in the history of culture that experimental and profoundly invigorating experiences were taking place Architects and artists voluntarily or forcibly driven to the margins of social importance began to react to a culturally unsustainable situation of which we know very little even today In *Experiments with Life Itself* Francisco Gonzalez de Canales studies a series of unrelated cases from the late 1930s to the late 1950s that he refers to as domestic self experimentation **The Rise of Awards in Architecture** Jean-Pierre Chupin, Carmela Cucuzzella, Georges Adamczyk, 2022-09-06 This book is the first scientific study to focus on awards in architecture and the built environment investigating their exponential growth since the 1980s The celebration of excellence in architecture and related fields remains a phenomenon on which there is strangely little scientific scrutiny What is to be understood from the plethora of award winning projects award winning buildings and awarded professional practices in the built environment year after year Glossy images partake in an intense ballet at every local regional national or international award ceremony and they are meant to embody proofs of architectural excellence However it is necessary to take a critical distance to question what awards are meant to embody symbolize and perhaps measure Each of the 10 chapters in this volume is centered on one question related to themes as varied as the comparison of Pritzker and Nobel Prizes the Prix de Rome the redefinition of quality through awards green awards and sustainability the multiplication of sustainable awards heritage awards architecture book awards the awarding of school architecture awards as mediations and awards as pedagogical devices Many fields once consolidated have featured a sharp increase in related prizes The original data compiled and

summarized in 4 appendices cover more than 150 award granting organizations in some 30 countries Our inventory includes upwards of 24 000 prizes awarded at more than 3 100 events the earliest of which is the first instance of Western architecture s seminal Grand Prix de Rome in France in 1720 A history of contemporary architecture is thus written through press releases that praise the merits of the heroes as much as their works and achievements And while awards can be vehicles that propel architecture forward they can also be Trojan horses in an era that is constantly on the lookout for event driven products small and big news and brand imaging

*Modern Architecture and Climate* Daniel A. Barber, 2023-04-11

How climate influenced the design strategies of modernist architects Modern Architecture and Climate explores how leading architects of the twentieth century incorporated climate mediating strategies into their designs and shows how regional approaches to climate adaptability were essential to the development of modern architecture Focusing on the period surrounding World War II before fossil fuel powered air conditioning became widely available Daniel Barber brings to light a vibrant and dynamic architectural discussion involving design materials and shading systems as means of interior climate control He looks at projects by well known architects such as Richard Neutra Le Corbusier Lcio Costa Mies van der Rohe and Skidmore Owings and Merrill and the work of climate focused architects such as MMM Roberto Olgyay and Olgyay and Cliff May Drawing on the editorial projects of James Marston Fitch Elizabeth Gordon and others he demonstrates how images and diagrams produced by architects helped conceptualize climate knowledge alongside the work of meteorologists physicists engineers and social scientists Barber describes how this novel type of environmental media catalyzed new ways of thinking about climate and architectural design Extensively illustrated with archival material Modern Architecture and Climate provides global perspectives on modern architecture and its evolving relationship with a changing climate showcasing designs from Latin America Europe the United States the Middle East and Africa This timely and important book reconciles the cultural dynamism of architecture with the material realities of ever increasing carbon emissions from the mechanical cooling systems of buildings and offers a historical foundation for today s zero carbon design
