**Economics and Climate Emergency** Barry Gills, Jamie Morgan, 2022-08-22 This book explores a series of connected themes focused on the role economics and other influential forms of theory and thinking have played in creating the current predicament and the scope for alternatives and how they might be framed Thirty years have passed since the inception of the United Nations Framework Convention on Climate Change UNFCCC and the beginning of policy on climate change Thirty wasted years To most politicians long term collective interest has been denominated in meaningless units of time a never and forever that has continually delayed action From complacency has come potential disaster and we are now living in a time of climate emergency and ecological breakdown The next decade is a pivotal period requiring fundamental change But numerous impediments remain Continual material energy and economic growth on a planetary scale

are manifestly impossible and yet economic theory takes these as a given and political leadership and policy seem unwilling to accept brute reality Instead they offer a series of implausible commitments and pledges rooted in technofixes without addressing the fundamental drivers of the problems the world faces The edited volume explores the issues and offers a variety of ways to think through the problems at hand from postgrowth degrowth and social ecological economics to policy assemblage and transversalism The chapters in this book were originally published in the journal *Globalizations* *Trust and Infrastructure in Scholarly Communications* Daniel W. Hook, Linda Suzanne O'Brien, Stephen Pinfield, 2023-01-06

International Social Science Journal ,2009      **Technology Innovation and Its Relations to Humanities and Social Sciences** □□□□, Lee Ki-Jun, 2003-03      *Sociological Abstracts* Leo P. Chall, 2001 CSA Sociological Abstracts abstracts and indexes the international literature in sociology and related disciplines in the social and behavioral sciences The database provides abstracts of journal articles and citations to book reviews drawn from over 1 800 serials publications and also provides abstracts of books book chapters dissertations and conference papers      **Public Understanding of Science** ,2007 An international journal of research in the public dimensions of science and technology      **Social Sciences Index** ,2001 The American Monthly Review of Reviews Albert Shaw, 1907      *Ethics and Economic Theory* Kurt Wilhelm Rothschild, 1993 This distinguished book provides a critical assessment of the relationship between economic theory scientific objectivity and ethics The main purpose of economic science is to analyse and explain the economic process but not necessarily to pass judgement as to whether this process is good or bad However in practice it is very difficult for the economist to study the laws of economics without ever touching ethical questions It is shown that economic theories despite avowals of scientific objectivity contain implicitly or explicitly many aspects which have ethical implications Making extensive use of real life examples and offering a new perspective on the ethical dimensions of economic analysis this book will prove essential reading for economists and philosophers alike      **Computer Applications in the Social Sciences** Edward E.
