Power, Networks and Violent Conflict in Central Asia Idil Tunçer-Kılavuz, 2014-06-27 When the five Central Asian republics gained independence from the Soviet Union in 1991 expectations of violent conflict were widespread Indeed the country of Tajikistan suffered a five year civil war from 1992 to 1997 The factors that the literature on civil wars in general and on the Tajikistan civil war in particular cites as the causes of war were also present in Uzbekistan but this country had a peaceful transition Examining this empirical puzzle by isolating the crucial factors that caused war to break out in Tajikistan but not Uzbekistan this book applies a powerful comparative approach to the broader question of why civil wars occur Based on fieldwork in both countries it challenges many common explanations of civil war both generally and in Tajikistan in particular This includes highlighting the importance of elites power perceptions which have their origins in the interaction of structural process and network related variables Without examining these interactions macro structural explanations alone cannot explain the occurrence of civil war in one country and its absence in another Applying the insights of bargaining theories of war from the literature on international relations to the civil war in Tajikistan this book will be of interest to students of violent conflict civil wars Central Asia and Asian Politics

Why? Charles Tilly, 2006 Why is a book about the explanations we give and how we give them a fascinating look at the way the reasons we offer every day are dictated by and help constitute social relationships Written in an easy to read style by distinguished social historian Charles Tilly the book explores the manner in which people claim establish negotiate repair rework or terminate relations with others through the reasons they give Tilly examines a number of different types of reason giving For example he shows how an air traffic controller would explain the near miss of two aircraft in several different ways depending upon the intended audience for an acquaintance at a cocktail party he might shrug it off by saying This happens all the time or offer a chatty colloquial rendition of what transpired for a colleague at work he would venture a longer more technical explanation and for a formal report for his division head he would provide an exhaustive detailed account Tilly demonstrates that reasons fall into four different categories Convention I'm sorry I spilled my coffee I'm such a klutz Narratives My friend betrayed me because she was jealous of my sister Technical cause effect accounts A short circuit in the ignition system caused the engine rotors to fail

Codes or workplace jargon We can't turn over the records We're bound by statute 369 Tilly illustrates his topic by showing how a variety of people gave reasons for the 9/11 attacks He also demonstrates how those who work with one sort of reason frequently convert it into another sort For example a doctor might understand an illness using the technical language of biochemistry but explain it to his patient who knows nothing of biochemistry by using conventions and stories Replete with sparkling anecdotes about everyday social experiences including the author's own Why makes the case for stories as one of the great human inventions Collective Violence, Contentious Politics, and Social Change Ernesto Castañeda, Cathy Schneider, 2017-05-08 Charles Tilly is among the most influential American sociologists of the last century For the first time his pathbreaking work on a wide array of topics is available in one comprehensive reader This manageable and readable volume brings together many highlights of Tilly's large and important oeuvre covering his contribution to the following areas revolutions and social change war state making and organized crime democratization durable inequality political violence migration race and ethnicity narratives and explanations The book connects Tilly's work on large scale social processes such as nation building and war to his work on micro processes such as racial and gender discrimination It includes selections from some of Tilly's earliest influential and out of print writings including *The Vendue* *Coercion Capital* and *European States* the classic *War Making and State Making as Organized Crime* and his more recent and lesser known work including that on durable inequality democracy poverty economic development and migration Together the collection reveals Tilly's complex compelling and distinctive vision and helps place the contentious politics approach Tilly pioneered with Sidney Tarrow and Doug McAdam into broader context The editors abridge key texts and in their introductory essay situate them within Tilly's larger opus and contemporary intellectual debates The chapters serve as guideposts for those who wish to study his work in greater depth or use his methodology to examine the pressing issues of our time Read together they provide a road map of Tilly's work and his contribution to the fields of sociology political science history and international studies This book belongs in the classroom and in the library of social scientists political analysts cultural critics and activists *Forthcoming Books* Rose Army, 2004 Contentious Politics Charles Tilly, Sidney Tarrow, 2015-08-18 Revolutions social movements religious and ethnic conflict nationalism and civil rights and transnational movements these forms of contentious politics combine in Charles Tilly's and Sidney Tarrow's *Contentious Politics* The authors present a set of analytical tools and procedures for study comparison and explanation of these very different sorts of contention Drawing on many historical and contemporary cases the book shows that similar principles describe and explain a wide variety of struggles as well as many more routine forms of politics This fully revised and updated edition explores some of the major contentious events that have taken place since the original book was published in 2007 including the Occupy movement in the United States the campaign for free elections in the city of Hong Kong insurrections against Middle Eastern dictatorships and armed conflicts on the border of the former Soviet Union Comprehensive and empirically rich *Contentious Politics* 2nd edition remains a valuable resource for

developing a more nuanced understanding of modern social movements and political conflicts for students and scholars

1920 edition Excerpt CHAPTER XXXIV THE TENTATIVE CHARACTER OF PROGRESS PROGRESS IS NOT IDENTICAL WITH GROWTH OF INTELLIGENT CONTROL DEGREES NOR IS IT DEMONSTRABLE IT IS ESSENTIALLY TENTATIVE I Cannot accept the view that progress is nothing more or other than the growth of intelligent control No doubt this is a large part of it an enlightened and organized public will is perhaps our most urgent need but after all life is more than intelligence and a conception that exalts this alone is sure to prove inadequate Progress must be at least as many faceted as the life we already know Moreover it is one of those ideas like truth beauty and right which have an outlook upon the infinite and cannot in the nature of the case be circumscribed by a definition The truth is that it is often one of the requisites of progress that we trust to the vague the instinctive the emotional rather than to what is ascertained and intellectual The spirit takes on form and clarity only under the stress of experience its newer outreachings are bound to be somewhat obscure and inarticulate The young man who does not trust his vague intuitions as against the formulated wisdom of his elders will do nothing original The opinion sometimes expressed that social science should set forth a definite tangible criterion of progress is also I think based on a false conception of the matter derived perhaps from mechanical theories of evolution Until man himself is a mechanism the lines of his higher destiny can never be precisely foreseen It is our part to form ideals and try to realize them and these ideals give us a working test of progress but there can be nothing certain or final about them The method of our advance is perhaps best indicated by that which g
