Exploring Musical Spaces Julian Hook, 2022 Exploring Musical Spaces is a comprehensive synthesis of mathematical techniques in music theory written with the aim of making these techniques accessible to music scholars without extensive prior training in mathematics The book adopts a visual orientation introducing from the outset a number of simple geometric models the first examples of the musical spaces of the book's title depicting relationships among musical entities of various kinds such as notes chords scales or rhythmic values These spaces take many forms and become a unifying thread in initiating readers into several areas of active recent scholarship including transformation theory neo Riemannian theory geometric music theory diatonic theory and scale theory Concepts and techniques from mathematical set theory graph theory group theory geometry and topology are introduced as needed to address musical questions Musical examples ranging from Bach to the late twentieth century keep the underlying musical motivations close at hand The book includes hundreds of figures to aid in visualizing the structure of the spaces as well as exercises offering readers hands on practice with a diverse assortment of concepts and techniques

Mathematical Investigations Phil DeMarois, Mercedes A. McGowen, Darlene Whitkanack, 2001 Reflective of AMATYC and NCTM standards for teaching mathematics this text the first in a series of two texts aims to make mathematics truly accessible to all students by taking an active approach to learning Focused on mathematical reasoning and problem solving strategies Mathematical Investigations presents a series of carefully sequenced investigations where students gather data and work collaboratively to discover key concepts The function concept is central to all topics from Chapter 3 forward and is explored through multiple representations This text explores variables notation and processes explicitly rather than assuming students have mastered these concepts in previous courses Content is explored in depth and contextual problems are revisited throughout the text to create a spiral that gives students multiple opportunities to master important skills and concepts Graphing calculators are integrated throughout the text to help students discover patterns and interpret data intelligently Students construct their knowledge of a particular topic in a real world context and then reinforce this knowledge through reflection practice and synthesis with other topics as they work through the text
