Cleaning the Printhead

This section describes how to clean the printhead.

When to Clean the Printhead

Clean the printhead weekly. Some applications may require more frequent cleaning. Check your printhead regularly. Operation in unusual conditions may require more frequent cleaning. Your operating experience dictates how often to clean your printhead.

Never clean the printhead at during shutdowns. By not cleaning the printhead at shutdowns, a cap of ink is allowed to dry over the end of the nozzle. This ink cap keeps air from entering the nozzle and drying the ink. This helps to prevent clogs in the nozzle.

NOTE: *If your printer is equipped with the Auto Flush option, the system will automatically clean the nozzle and ink return line with make-up fluid when you shut down the printer. In this case, an ink cap will not form over the nozzle opening because the ink inside the nozzle is flushed away. When shutting the printer down while the printer is in the service mode, the Auto Flush procedure is not automatically activated.*
