Explorations In Global Ethics Comparative Religious Ethics And Interreligious Dialogue:

Explorations in Global Ethics Sumner Twiss, Bruce Grelle, 2019-08-30 This volume for the first time brings the scholarly discipline of comparative religious ethics into constructive collaboration with the community of interreligious dialogue Its design is premised on two important insights First interreligious dialogue offers to comparative religious ethics a new more persuasive rationale agenda of issues and practical orientation Second comparative religious ethics offers to interreligious dialogue an arsenal of critical tools and methods which will enhance the sophistication of its practical work In this way both theory a dominant concern and strength of comparative religious ethics and praxis a dominant concern and strength of interreligious moral dialogue are joined together in mutual effort each contributing to the benefit of the other The volume s contributors share this vision of collaboration drawing explicitly from both communities of discourse in a manner that crosses disciplinary and professional boundaries to deal creatively and constructively with important methodological and global moral issue Although theory and practice cannot easily be separated in such a collaborative project for the purpose of clarity the volume is divided into two main parts The first specifically engages questions of method theory and the social role of the public intellectual the second on substantive moral themes and issues many of which were raised at the 1993

Constructing Moral Concepts of God in a Global Age Myriam Renaud, 2022-07-29 *Constructing Moral Concepts of God in a Global Age* focuses on what people say and think about God rather than on arguments about God's existence It advances a theological method or step by step approach to explore and reframe personal convictions about God and the worldviews shaped by those convictions Since a moral God is more likely to foster a moral life this method integrates an ethical check to ensure that understandings of God and their associated worldviews are validly moral The proposed method builds on the work of twentieth century theologian Gordon Kaufman during the Kantian phase of his work It anticipates a person like God who hears prayers loves without end and comforts in times of hardship To accommodate today's pluralistic and globalized world the ethical check integrated in the method is a widely collaborative and vetted global ethic the Parliament of the World's Religions Declaration Towards a Global Ethic This volume of constructive philosophical theology is written for seminary students educators clergy study groups and anyone interested in delving more deeply and systematically into understandings of God whether their own or those of others

Precision-guided Munitions and Human Suffering in War James E. Hickey, 2016-04-08 James Hickey proceeds from the premise that throughout history humans have demonstrated a proclivity for using violence against one another as a means to achieve an end means enabled in many respects by the technologies available at the time Advancing technology has often been a prime enabler of ever increasing levels of violence and attendant human suffering At a few junctures in history however certain technologies have seemingly provided the armed forces that possess them the ability to fight wars with decreasing levels of violence and suffering Today precision guided munitions PGMs with their high degree of discrimination and accuracy again hold such promise This book seeks to answer the question Do PGMs mitigate suffering in war and have these weapons changed the way decisions regarding war and peace have been made Answering this question helps us understand possible shifts in emphasis in modern warfare both in terms of methods employed and of the greater concern placed on limiting human suffering during conflict This book will help students of ethics just war and military history and senior military and civilian leaders to understand the possible outcomes and wider implications of their strategic choices to use such technology

Religion and American Cultures Gary Laderman, Luis León, 2014-12-17 This four volume work provides a detailed multicultural survey of established as well as new American religions and investigates the fascinating interactions between religion and ethnicity gender politics regionalism ethics and popular culture This revised and expanded edition of *Religion and American Cultures Tradition Diversity and Popular*

Expression presents more than 140 essays that address contemporary spiritual practice and culture with a historical perspective. The entries cover virtually every religion in modern day America as well as the role of religion in various aspects of U S culture. Readers will discover that Americans aren't largely Protestant, Catholic or Jewish anymore and that the number of popular religious identities is far greater than many would imagine. And although most Americans believe in a higher power, the fastest growing identity in the United States is the none: those Americans who elect none when asked about their religious identity, thereby demonstrating how many individuals see their spirituality as something not easily defined or categorized. The first volume explores America's multicultural communities and their religious practices, covering the range of different religions among Anglo Americans and Euro Americans as well as spirituality among Latino, African American, Native American and Asian American communities. The second volume focuses on cultural aspects of religions, addressing topics such as film, Generation X, public sacred spaces, sexuality and new religious expressions. The new third volume expands the range of topics covered with in-depth essays on additional topics such as interfaith families, religion in prisons, belief in the paranormal and religion after September 11, 2001. The fourth volume is devoted to complementary primary source documents. *Interfaith Dialogue* Dharam Singh, 2002 *Journal of the Society of Christian Ethics*, 2009

A thoroughly revised and expanded new edition of this popular textbook yet retains the unique narrative style approach which has proved so successful with students. Updated to reflect recent discussions on globalization and its influence on cross-cultural and comparative ethics, economic dimensions to ethics, Gandhian traditions and global ethics in an age of terrorism. Expands coverage of Asian religions, quest narratives, the religious and philosophical approach to ethics in the West and considers Chinese influences on Thich Nhat Hanh's Zen Buddhism and Augustine's Confessions.
