programs to promote children's and adolescents positive development via effective parenting. We are particularly interested in manuscripts focusing on the following research subtopics:

- 1 Theories and underlying mechanisms, mediators or moderators to explain why and how could parenting affect child and adolescent development.
- 2 The associations between parenting and child development in different demographic contexts or at different times.
- 3 The similarities and discrepancies between children and parent report about parenting and its influence on the child and adolescent development.
- 4 The specific effect of paternal parenting or the effect of co-parenting on child and adolescent development.
- 5 The potential interaction effect of parenting and other factors such as teacher, peer, grandparent and sibling on child and adolescent development.

Quantitative studies (e.g. cross-sectional and longitudinal studies, cohort studies, experimental studies, intervention studies, meta-analysis) and qualitative studies (e.g. interview studies, observational studies, systematic review) are both welcome.
