

General Electric GE90

The General Electric GE90 is a family of high-bypass turbofan aircraft engines built by GE Aviation for the Boeing 777. In 1995, the GE90 engine debuted aboard a British Airways 777 airplane along with commercial aviation's first-ever carbon-fiber composite fan blades. Early GE90 engine models boasted outputs between 74,000 and 94,000 lbs. of thrust, and today it remains the world's largest turbofan engine.

GE has continued to improve upon the GE90 design with larger variants (-1108 and -1158) built exclusively for Boeing's largest 777 models (777-200LR, 777-300ER and 777F). The GE90 is now the best-selling engine for that aircraft family.
