Geek Heresy:

Geek Heresy Kentaro Toyama, 2015-05-26 After a decade designing technologies meant to address education health and global poverty award winning computer scientist Kentaro Toyama came to a difficult conclusion Even in an age of amazing technology social progress depends on human changes that gadgets can't deliver Computers in Bangalore are locked away in dusty cabinets because teachers don't know what to do with them Mobile phone apps meant to spread hygiene practices in Africa fail to improve health Executives in Silicon Valley evangelize novel technologies at work even as they send their children to Waldorf schools that ban electronics And four decades of incredible innovation in America have done nothing to turn the tide of rising poverty and inequality Why then do we keep hoping that technology will solve our greatest social ills In this incisive book Toyama cures us of the manic rhetoric of digital utopians and reinvigorates us with a deeply people-centric view of social change Contrasting the outlandish claims of tech zealots with stories of people like Patrick Awuah a Microsoft millionaire who left his engineering job to open Ghana's first liberal arts university and Tara Sreenivasa a graduate of a remarkable South Indian school that takes impoverished children into the high tech offices of Goldman Sachs and Mercedes Benz Geek Heresy is a heartwarming reminder that it's human wisdom not machines that move our world forward **Early**

experience teaching a Massive Open Online Course MOOC and the attendant pressure on professors especially those in the humanities to embrace new technologies in the STEM era And yet as she argues MOOCs are just the latest example of the near religious faith that some universities have in the promise of technological advances As a teacher of rhetoric Head is well-versed at sniffing out the sophistry embedded in the tech jargon increasingly rife in the academy Disrupt This is a broader-based critique of the promises of technological disruption and the impact of Silicon Valley thinking on an unsuspecting ill-prepared and often gullible university community grasping for relevance while remaining in thrall to the technologists
