**Global Family Planning Revolution** Warren C. Robinson,John A. Ross,2007 The striking upsurge in population growth rates in developing countries at the close of World War II gained force during the next decade From the 1950s to the 1970s scholars and advocacy groups publicized the trend and drew troubling conclusions about its economic and ecological implications Private educational and philanthropic organizations government and international organizations joined in the struggle to reduce fertility Three decades later this movement has seen changes beyond anyone s most optimistic dreams and global demographic stabilization is expected in this century The Global Family Planning Revolution preserves the remarkable record of this success Its editors and authors offer more than a historical record They discuss important lessons for current and future initiatives of the international community Some programs succeeded while others initially failed and the analyses provide valuable guidance for emerging health related policy objectives and responses to global challenges      Critical

common assumptions illustrates effective solutions and sets out research policy and programmatic agendas for the present and future This is a comprehensive volume which provides a valuable resource to researchers educators practitioners policymakers and students as well as anyone studying or advocating for reproductive health Environmental Change and Security Project Report ,2003 **Global Population Profile** ,2002 Is Over-population Still the Problem? Lisa Ann Richey,2002 Why Women Will Save the Planet Friends of the Earth,2015-12-01 Cities across the globe are growing fast Today many are environmental nightmares with polluted air excessive energy consumption and an absence of nature But big cities don t have to mean a dystopian future They can be turned around to be powerhouses of well being and environmental stability if we empower women This book is a unique collaboration between C40 and Friends of the Earth showcasing pioneering voices in the environmental and feminist movements This book reveals just how women s empowerment is critical to environmental sustainability This book is a rallying call for the planet for women for everyone *Annual Report* Rockefeller Foundation,1986 **Global population profile** ,2004 Seven Billion and Counting Michael M. Andregg,2014-05-01 October 31 2011 marked an uneasy milestone for Planet Earth On this day the global population surpassed seven billion What does that mean for a world that until the nineteenth century was home to less than one billion people Experts say it means the planet is in trouble Some wonder if Earth will even be able to sustain human life at its current rate of growth Will there be enough food for everyone Will conflicts over land increase How will the environment be affected Can humanity survive the predicted disasters More than a simple case of running out of space the population crisis is interwoven with a host of other issues from climate change and resource management to war disease and poverty Discover how all these factors converge to place an entire planet in crisis mode and explore what sort of responses that crisis may require **Knowledge, Attitude, and Commitment of Parliamentarians on Population, Reproductive Health, and Gender Issues at National Parliament** ,2006 **Coping with Population Challenges** Louise Lassonde,2014-04-23 Despite rapidly decreasing rates of population growth caused by reduced fertility in the majority of world regions demographers are predicting that the world s population will still double by the year 2050 The question is therefore no longer the traditional one of whether the planet can support so many people but how to provide a sustainable future for ten billion individuals Quantitative problems have become ethical ones *Coping with Population Challenges* addresses these issues in the context of international debate and agreements since the first World Population Plan of Action in 1974 to the 20 year Programme of Action adopted at the International Conference on Population and Development in Cairo in 1994 The author describes how the Programme of Action focalizes on women s issues reproductive choice and the notion of the individual However she identifies a number of important but neglected areas of the debate that the Programme failed to address and brings to light some of the inconsistencies that need to be resolved if the Programme is to be implemented The author also looks at the underlying ethical dimension of all choices relating to the population issue and suggests measures and

machinery for giving effect to states commitments including reformulating problems and defining the appropriate economic framework for solutions The book is an excellent introduction for the non specialist to a very topical debate and a useful reference for researchers LOUISE LASSONDE is director of the Fondation du Devenir Geneva In her capacity as anthropologist and demographer Dr Lassondc has worked closely with the United Nations and non governmental organizations in many countries Originally published in 1997

**Knowledge, Attitude, and Commitment of Parliamentarians on Population, Reproductive Health, and Gender Issues at East Nusa Tenggara, West Kalimantan, and South Sumatera Provincial Parliament** ,2006 **Reproductive States** Rickie Solinger,Mie Nakachi,2015-12-01

When it comes to government s role in personal matters such as family planning most bristle at any interference from the State on how to exercise their reproductive rights China s infamous one child policy is a well known example of reproductive politics but history is filled with other examples of governmental population control to advance its interests Reproductive States is the first volume of a collection of case studies that explores when and how some of the most populous countries in the world invented and implemented state population policies in the 20th century The authors scholars specializing in reproductive politics survey population policies from key countries on five continents to provide a global perspective Regardless of the type of government or its cultural history many of these countries have developed similar policies to control their populations and attempt to combat social problems such as poverty and hunger However the common denominator is that states have used women s bodies as a political resource Far from being just an overseas problem this volume illustrates how other countries have developed their strategies in response to goals and tactics driven by the United Nations and the United States Due to fears of a post World War II population bomb and uncertainty of how to deal with the world s poor after the Cold War the U S and the Soviet Union led the charge among nations to devise strategies to control their populations but in different ways The U S and some European countries pressed the poor and ethnic minorities to limit reproduction China s one child policy targeted all ranks of society while Soviet women who already had few rights were under surveillance through state planned services such as medical care and commodity distribution to detect pregnancy Interweaving biopolitics gender studies statecraft and world systems Reproductive States offer reflections on the outcome of such policies and their legacies in our day

**State of World Population 2002** United Nations Population Fund,2002 Fertility and population growth are highest in the world s poorest countries with the least developed countries estimated to triple their populations from 600 million in 1995 to 1.8 billion by 2050 Dealing with population and reproductive health concerns within the broad framework of the UN Millennium Goals is crucial to achieving sustainable development objectives This report reviews some key issues involved in progress to tackle global poverty including the many dimensions of poverty demographics and macroeconomics gender inequality health differentials and financing HIV AIDS and access to education It outlines a development framework for action including better programme targeting to ensure benefits reach the poor
