Globalization Health Indigenous Peoples Colonization:

Globalization and the Health of Indigenous Peoples Ahsan Ullah, 2016-11-18 In 70 countries worldwide there is an estimated 370 million indigenous peoples and their rich diversity of cultures religions traditions languages and histories has been significant source of our scholarships However the health status of this population group is far below than that of non indigenous populations by all standards Could the persisting reluctance to understand the influence of self governance globalization and social determinants of health in the lives of these people be deemed as a contributor to the poor health of indigenous peoples Within this volume Ullah explores the gap in health status between indigenous and non indigenous peoples by providing a comparative assessment of socio economic and health indicators for indigenous peoples government policies and the ways in which indigenous peoples have been resisting and adapting to state policies A timely book for a growing field of study Globalization and the Health of Indigenous Peoples is a must read for academics policy makers and practitioners who are interested in indigenous studies and in understanding the role that globalization plays for the improvement of indigenous peoples health across the world

Theorizing Native Studies Audra Simpson, 2014-05-07 This important collection makes a compelling argument for the importance of theory in Native studies Within the field there has been understandable suspicion of theory stemming both from concerns about urgent political issues needing to take precedence over theoretical speculations and from hostility toward theory as an inherently Western imperialist epistemology The editors of Theorizing Native Studies take these concerns as the ground for recasting theoretical endeavors as attempts to identify the larger institutional and political structures that enable racism inequities and the displacement of indigenous peoples They emphasize the need for Native people to be recognized as legitimate theorists and for the theoretical work happening outside the academy in Native activist groups and communities to be acknowledged Many of the essays demonstrate how Native studies can productively engage with others seeking to dismantle and decolonize the settler state including scholars putting theory to use in critical ethnic studies gender and sexuality studies and postcolonial studies Taken together the essays demonstrate how theory can serve as a decolonizing practice Contributors Christopher Bracken Glen Coulthard Mishuana Goeman Dian Million Scott Morgensen Robert Nichols Vera Palmer Mark Rifkin Audra Simpson Andrea Smith Teresia Teaiwa

This captivating work vividly evokes living human histories, introducing the reader to manifestations of colonialism as expressed through war, militarization, extractive economies, migrations, and diasporas; racialization, biopolitical management, and unruly and creative responses and resistances by colonized peoples.
