Globalization and Human Security Paul Battersby, Joseph M. Siracusa, 2009-03-16 This concise text presents a focused well rounded and clear eyed introduction to the concept of human security Questioning the utility of traditional national security frameworks in the postDCold War era Paul Battersby and Joseph Siracusa argue that we must urgently reconsider the principle of state sovereignty in a global world where threats to humanity are beyond the capacity of any one nation to address through unilateral action A welcome alternative to state centric approaches to security this balanced book will be a valuable supplement for courses in international and national security

Globalization, Development and Human Security Anthony G. McGrew, Nana Poku, 2007

Globalization, Difference, and Human Security Mustapha Kamal Pasha, 2013-10-23 Globalization Difference and Human Security seeks to advance critical human security studies by re framing the concept of human security in terms of the thematic of difference Drawing together a wide range of contributors the volume is framed among others around the following key questions What are the silences and erasures of advancing a critical human security alternative without making recognition of difference its central plank How do we rethink the complex interplay of human security and difference in distinct and varied spatial and cultural settings produced by global forces What is the nexus between human security and the broader field of global development What new challenges to Human Security and International Relations are produced with the rise of the post liberal or post secular subject In what ways releasing human security from identification with the territorial state helps reconceptualize culture How does Human Security serve as a subspecies of modern humanitarian thought or the latter reinforce imperial imaginaries and the structures of order and morality Is the pursuit of indigenous rights fundamentally counterpoised to the pursuit of human security What difference it might make to take the doings and beings of communities of subsistence rather than basic needs wealth seeking individuals as a point of departure in critical human security studies How does reconstruction bind post war and post disaster states and societies into the global capitalist democratic political structure

Human Security in South Asia P. R. Chari, Sonika Gupta, 2003 The word security has a military connotation and refers to the activities involved in protecting or defending a country in which the State has a central role This book argues that the State provides as well as threatens security and that by broadening the concept of security to include both military and non military threats such as those related to ecological social economic and political causes a system of checks and balances can be introduced to regulate the State

Global Development and Human Security Robert Picciotto, Michael Clarke, Funmi Olonisakin, 2011-12-31 Global Development and Human Security explores the possibility of connecting all countries to the global economy while defusing the social tensions and managing the security risks that can result from exposure to a

turbulent international system The complex intersection between security and development policies has not been adequately mapped or explored Frail and failing states that lack sound market and security institutions are the weak links in an interconnected global system Yet aid allocation principles discourage engagement with these difficult partners and the insular culture of development assistance hinders interaction with the security community In a world beset by problems without passport infectious diseases environmental pollution international crime conflict spillovers terrorism etc a new paradigm should supplant the now obsolete development consensus The authors took stock of current development practices through the prism of Sweden's Shared Responsibility bill which addresses peace security opportunity environmental conservation human rights and democracy The resulting volume draws the implications of emerging threats to global peace and prosperity for development policy and practice It seeks to build bridges of understanding between the development community and the security establishment by bringing together lessons of experience currently scattered in the literature Each chapter is self contained and includes policy findings and recommendations The book is principally aimed at practitioners who need up to date knowledge about security and development issues Publication of this paperback edition makes the book available for use as an introductory text for security specialists with little knowledge of development or for development specialists with limited knowledge of security or for college or university students in these areas Global

decline in confidence in democratic institutions In terms of the economy globalization exacerbates disparities between rich
and poor regions while polarization exacerbates wealth gaps and opportunity disparities Social polarization breeds mistrust
and intolerance leading to identity based disputes and further splintering society Although globalization encourages
integration and connectivity it has also heightened polarizing tendencies It exacerbates international instability fuels trade
disputes and expands the wealth gap between the rich and the poor Traditions and values are eroding as a result of cultural
globalization In this respect globalization must be used to promote inclusivity tolerance and cross national cooperation in
