Such,2018-06-19 This book constitutes the refereed proceedings of the 10th International Symposium on Engineering Secure Software and Systems ESSoS 2018 held in Paris France in June 2018 The 10 papers consisting of 7 regular and 3 idea papers were carefully reviewed and selected from 26 submissions They focus on the construction of secure software which is becoming an increasingly challenging task due to the complexity of modern applications the growing sophistication of security requirements the multitude of available software technologies and the progress of attack vectors Detecting Peripheral-based Attacks on the Host Memory Patrick Stewin,2014-12-27 This work addresses stealthy peripheral based attacks on host computers and presents a new approach to detecting them Peripherals can be regarded as separate systems that have a dedicated processor and dedicated runtime memory to handle their tasks The book addresses the problem that peripherals generally communicate with the host via the host s main memory storing cryptographic keys passwords opened files and other sensitive data in the process an aspect attackers are quick to exploit Here stealthy malicious software based on isolated micro controllers is implemented to conduct an attack analysis the results of which provide the basis for developing a novel runtime detector The detector reveals stealthy peripheral based attacks on the host s main memory by exploiting certain hardware properties while a permanent and resource efficient measurement strategy ensures that the detector is also capable of detecting transient attacks which can otherwise succeed when the applied strategy only measures intermittently Attackers exploit this strategy by attacking the system in between two measurements and erasing all traces of the attack before the system is measured again *Electronic Government* ,2008 This collection meets the need for quality authoritative research in this domain with an authoritative collection Studies from the electronic government researchers worldwide enable libraries in academic government and other settings to provide a collection on topics like digital government electronic justice government to government information policy and cyber infrastructure research and methodologies Provided by publisher Local Communication Systems, LAN and PBX, II Guy Pujolle,Ramon Puigjaner,1991 Both theoretical and practical papers are compiled in this proceedings volume presenting an expansive forum of ideas from
