Evaluation For Continuing Education A Comprehensive Guide To Success:

Evaluation for Continuing Education Alan B. Knox, 2002-10-02 Evaluation for Continuing Education provides the useful and practical tools necessary to ensure a successful program evaluation. The book presents systematic guidelines aimed at enhancing understanding of evaluation concepts and procedures and offers manageable ways to selectively include evaluation activities as an integral part of program planning, implementation, and justification. Author Alan Knox reveals that the key to successful evaluations that improve education programs for adults is a basic rationale for why and how. He helps readers select and develop their own rationale throughout the course of the book while suggesting fundamental evaluation concepts and procedures. He shows how to distinguish some program aspect upon which a specific evaluation project will focus, including needs assessment, goals and policies, staffing assessment, materials development, and more, and summarizes examples of evaluation reports that reflect the various types of providers and scales on which evaluations are conducted. Knox offers a particularly wide variety of these examples, enabling readers to reflect on implications for their own evaluations and fashion unique guidelines and procedures that fit their own situations.

Standards-Based and Responsive Evaluation Robert E. Stake, 2004 We can be grateful that Dr. Stake decided to cap his distinguished career by sharing his ideas in writing. This is a book that evaluators will want to have in their personal library. It tells us a lot about our field, highlights contrasting ways of evaluating without pitting one against the other, and manages to remind us why many of us chose this line of work in the first place. **EVALUATION AND PROGRAM PLANNING** Authored by a master writer and evaluator, *Standards Based and Responsive Evaluation* explores the many conceptual choices an evaluator needs to make when doing an evaluation, devoting attention to stakeholders, weighing ethical risks, and writing a useful report. The book begins with the main strategic choices an evaluator needs to make between approaches: quantitatively by explicating criteria, needs, standards, and performances; or qualitatively by studying the activity, aspirations, problems, and accomplishments of the participants and critical observers. After reading the text, students will have a better appreciation of evaluation as a process that needs to be custom-fit to the situation. Throughout the book, Stake presents evaluation as a series of choices for the reader: To remain independent or to join with program staff or stakeholders; To value personal experience as evidence or to shun it as biased; To aid development formatively or to assess the existing program summatively; To use issues, goals, gains, efficiency, or problem solving as the key conceptual structure; To invest small or large in trying out and validating data-gathering procedures; To support the standards and ethical codes of professional associations. *Standards Based and Responsive Evaluation* will prove an essential text for program evaluation courses in education, nursing, social work, psychology, sociology, communication, and anthropology. Experienced researchers and professional evaluators will also find this an invaluable reference for a more experiential, interpretive approach to evaluation work and policy setting.
