

Reading Comprehension

**GRADE
7**

**WEEK
1**

Monitor Comprehension

When students monitor their comprehension, they keep track of what they understand the material and identify where their understanding breaks down. Related activities include asking questions, taking notes, and paraphrasing what has been read.

**DAY
1**

Reproduce the Monitor Comprehension sheet and distribute it to students. Then introduce the Monitor Comprehension strategy to students and explain: Good readers pay attention as they read to ensure understanding. If readers are confused, they can reread, ask questions, make notes, or try to put the information into their own words. Have students read the passage independently. Model the strategy: As I was reading, I didn't understand why Tom Sanders decided to jump out of airplanes. I went back and reread his quote about enjoying "the most out of this life." Then I helped me understand that Sanders finds enjoyment in activities after comparing his first parachuting experience to the strategy practice activity. Then direct students to complete the task.

DAY 4**

READ THE PASSAGE

Read slowly. When you see a footnote with a footnote, pause to read the footnote. Then read the material again before you continue.

Web Crawlers

If everyone stopped using the Internet for one day, the Internet would still be a pretty busy place. Even when people are not online, automatic programs travel the Internet.

Programs known as "web crawlers" constantly browse the Internet. They follow coded instructions to gather data. These programs "crawl" invisibly, collecting and sending information 24 hours a day. Some of the data that web crawlers collect? They report information about how many people are using the Internet and which pages they are visiting. They also make copies of web pages, which are stored and indexed by search engines. The result is faster and more accurate web searches.

Some web crawlers serve a more menacing function. They harvest e-mail addresses for advertisers who send unsolicited e-mail messages known as "spam." When your mailbox fills up with spam, chances are good that a web crawler helped put it there.

*Web crawlers are sometimes called "spiders" because they "crawl" around the web.

¹According to one report, about 163 billion spam messages are sent in a single day, accounting for 66% of all e-mail messages sent.

STRATEGY PRACTICE How did the footnotes help you understand the passage?
