Event-Cities 3 Bernard Tschumi, 2005-04-01 How concept context and content interact in architecture provocative examples from recent projects by Bernard Tschumi In *Event Cities 3* Bernard Tschumi explores the complex and productive triangulation of architectural concept context and content There is no architecture without a concept an overriding idea that gives coherence and identity to a building But there is also no architecture without context historical geographical cultural or content what happens inside Concept context and content may be in unison or purposely discordant Against the contextualist movement of the 1980s and 1990s which called for architecture to blend in with its surroundings Tschumi argues that buildings may or may not conform to their settings but that the decision should always be strategic Through documentation of recent projects including the new Acropolis Museum in Athens a campus athletic center in Cincinnati museums in Sao Paulo New York and Antwerp concert halls in France and a speculative urban project in Beijing Tschumi examines different ways that concept context and content relate to each other in his work In the new Acropolis Museum for example Tschumi looks at the interaction of the concept a simple and precise museum with the clarity of ancient Greek buildings with the context its location at the base of the Acropolis 800 feet from the Parthenon and the content which incorporates archaeological excavations on the building site into the fabric of the museum Through provocative examples Tschumi demonstrates that the relationship of concept context and content may be one of indifference reciprocity or conflict all of which he argues are valid architectural approaches Above all he suggests that the activity of architecture is less about the making of forms than the investigation and materialization of concepts

Conceptual and Contextual Perspectives on the Modern Law of Treaties Michael J. Bowman, Dino Kritsiotis, 2018-10-31 In recent years there has been a flourishing body of work on the Law of Treaties crucial for all fields within international law However scholarship on modern treaty law falls into two distinct strands which have not previously been effectively synthesized One concerns the investigation of concepts which are fundamental to or inherent in the law of treaties generally such as consent object and purpose breach of obligation and provisional application while the other focuses upon the application of treaties and of treaty law in particular substantive e g human rights international humanitarian law investment protection environmental regulation or institutional contexts including the Security Council the World Health Organization the International Labour Organization and the World Trade Organization This volume represents the culmination of a series of collaborative explorations by leading experts into the operation development and effectiveness of the modern law of treaties as viewed through these contrasting perspectives

Polish Architecture in Contemporary Innovation Nina Juzwa, Jakub Świerzawski, 2023-09-28 Authored by two architects *Polish Architecture in Contemporary Innovation Thoughts Dreams and Places* tells a story of buildings that were built in Poland between 1980 and 2020 as architecture developed in the Western world and Japan Its main focus is public utility buildings which the authors have touched in situ and which have moved them or sparked their interest The book is

divided into three parts Part I focuses on the problem of creating and shaping architectural form and uses examples of both international and Polish architecture In this section the authors pose the question why is the Pritzker Prize so important Part II attempts to answer the question of how architecture can change the image of a place The answer consists of mainly Polish examples of user friendly architecture value and beauty in architecture and place Part III analyses buildings that were created in contemporary Poland Examples are listed in groups according to their function pointing out forms that were inspired by the culture of the region the historical culture of the place or those which are a new quality and are the foundation of the creation of a place This book aims to demonstrate Polish architectural solutions in the context of contemporary trends in the West traditionally seen as more technically and technologically developed countries The floor plans and sections of the buildings presented in the book show the beauty of geometric and formal solutions and give a new and rare perspective on the latest changes in modern Polish architecture This book will be of interest to architects as well as researchers and students of contemporary Polish architecture and culture and its place in the European and international context The Polish edition of this book published in 2021 by the National Institute of Architecture and Urban Planning in Warsaw received the Vitruvius Prize 2022 by the Architecture and Urban Planning Committee of the Polish Academy of Sciences

Paradigm Islands Teresa Stoppani, 2011 A critical look at the making of Manhattan and Venice provides a background to addressing the dynamic redefinition and making of space today The book concerns architecture and the city built imagined and narrated but importantly considers architecture as an intellectual and spatial process rather than a product

Image of Istanbul, Impact of ECOC 2010 on the City Image Evinc Dogan, 2016-07-31 Istanbul took the stage as one of the three European Capital of Culture ECoC cities in 2010 In this spectacle the urban spaces were projected as the theatre d cor while residents and visitors became the spectators The images of Istanbul pile up in videos and posters to show the city in every aspect in which everything becomes mishmash and the message gets lost in the chaos While Istanbul is depicted as a mystified city through Orientalist representations this image of Istanbul moves between the opposite ends of the contrasting pairs and in contestation Culture defined as making sense of the world Hall 1997 2 is an integral part of branding a place which involves cultural exchange Anholt 2005 140 Mega events may be used as forms of advertising for city marketing and branding where the signification is not only about production of meaning but also staging of the meaning The cities hosting mega events can be turned into the protagonists of the spectacle by showcasing their cultural products as well as cultural being Thus what staged there are the city its image as well as the events The mega events are helpful to spread the word about the city but the meaning is created also through imaging the city and positioning this image in the minds of the people
