**Elementary Mathematics Curriculum Materials** Janine T. Remillard, Ok-Kyeong Kim, 2020-03-16 The book presents comparative analyses of five elementary mathematics curriculum programs used in the U S from three different perspectives the mathematical emphasis the pedagogical approaches and how authors communicate with teachers These perspectives comprise a framework for examining what curriculum materials are comprised of what is involved in reading and interpreting them and how curriculum authors can and do support teachers in this process Although the focus of the analysis is 5 programs used at a particular point in time this framework extends beyond these specific programs and illuminates the complexity of curriculum materials and their role in teaching in general Our analysis of the mathematical emphasis considers how the mathematics content is presented in each program in terms of sequencing the nature of mathematical tasks cognitive demand and ongoing practice and the way representations are used Our analysis of the pedagogical approach examines explicit and implicit messages about how students should interact with mathematics one another the teacher and the textbook around these mathematical ideas as well as the role of the teacher In order to examine how curriculum authors support teachers we analyze how they communicate with teachers and what they communicate about including the underlying mathematics noticing student thinking and rationale for design elements The volume includes a chapter on curriculum design decisions based on interviews with curriculum authors *Everyday Mathematics* University of Chicago. common question posed by educators seeking to build and sustain a PLC Where do we begin Access a solid conceptual framework and concrete illustrations of how schools operate when they are functioning as PLCs Two case studies examine schools that have made the transformation showcasing district and curriculum level efforts to focus on student learning

*Where Teachers Thrive* Susan Moore Johnson, 2020-07-29 2020 PROSE Award Winner Education Theory Category 2019 Outstanding Academic Title Choice In *Where Teachers Thrive* Susan Moore Johnson outlines a powerful argument about the importance of the school as an organization in nurturing high quality teaching Based on case studies conducted in fourteen high poverty urban schools the book examines why some schools failed to make progress while others achieved remarkable results It explores the challenges that administrators and teachers faced and describes what worked what didn't work and why Johnson draws on vivid portraits of schools to highlight an array of school based systems and practices that support teachers professional growth and effectiveness These include a rich and interactive hiring process team based curriculum planning and assessment and informative feedback and ongoing professional learning Critical to all of these is the role of the principal as an essential agent in a school's success Although these elements may vary from school to school Johnson argues that together these systems provide a comprehensive mutually reinforcing set of well orchestrated strategies that can help schools deliver results that exceed the sum of teachers individual efforts Since 2000 policy makers and education officials have diligently sought to improve schools by improving the quality of individual teachers However even if those teachers are skilled and committed the schools where they work are all too often disjointed dysfunctional organizations that serve no one well *Where Teachers Thrive* explains clearly how educators within a school can join together to adopt systems of practice that ensure growth and success by all teachers and their students

*Hands Down, Speak Out* Kassia Omohundro Wedekind, Christy Hermann Thompson, 2023-10-10 Math coach Kassia Omohundro Wedekind and literacy coach Christy Hermann Thompson have spent years comparing notes on how to build effective classroom communities across the content areas How they wondered can we lay the groundwork for classroom conversations that are less teacher directed and more conducive to student to student dialogue Their answers start with *Hands Down Conversations* an innovative discourse structure in which students ideas and voices take the lead while teachers focus on listening and facilitating In addition to classroom stories and examples Christy and Kassia provide 28 micro lessons designed to help K-5 students develop and exercise their speaking and listening muscles Inside *Hands Down Speak Out* you'll learn how to Build talk communities that are accessible to everyone especially those whose voices are often traditionally left out of classroom discourse Analyze classroom conversations in order to plan next steps for developing the classroom talk community Plan and facilitate three types of conversations across literacy and math Christy and Kassia believe that the development of dialogue skills is worth the investment of time not only because it has the power to deepen our understanding of literacy and mathematics but also to deepen our understanding of ourselves our communities and the world

**Test Driven** Linda Valli, 2008-07-24 I don't always

know students by face I know them by data an elementary curriculum specialist explains ruefully in this broad examination of how No Child Left Behind impacts schools and shapes teaching practice Capturing the changes teachers are experiencing especially in the areas of mathematics and reading the authors compare and contrast three schools with diverse student populations examining how they differ in school norms and structures professional roles and responsibilities curriculum staff development and teaching and learning Including rich observational data and personal accounts from educators this inside look at school reform Analyzes the effects of policies from multiple levels examining relationships among initiatives at the federal state district and local school levels Focuses on the impact that high stakes testing policies have on reading and mathematics instruction in 4th and 5th grades Provides teacher and principal perspectives on factors that influence how practitioners make sense of mediate and construct school policy
