and of repeating reductive heteronormative and racist versions of feminist movements we believe that the concept of generation does have critical purchase for feminist media scholars Indeed precisely because of the problematic ways in which it is used and its prevalence as a volatile yet only too palpable organizing category generation is in need of continual critical analysis and is an important tool to be used with care and nuance when examining the multiple routes through which power functions in order to marginalize reward and oppress This book covers a range of media forms film games digital media television print media and practices of media production intervention and representation The contributors explore how figures at particular stages of life particularly the girl and the aging woman are constructed relationally and circulate within media with particular attention to sexuality The book emphasizes exploring the ways in which the category of generation is mobilized in order to gloss sexism racism ageism class oppression and the effects of neoliberalism The chapters in this book were originally published as a special issue of Feminist Media Studies
