

Europe 2015 Daniel H Kleiman

Christian Drosten

Europe 2015 Daniel H Kleiman:

War and Memory at the Time of the Fifth Crusade Megan Cassidy-Welch, 2019-07-01 In this book Megan Cassidy Welch challenges the notion that using memories of war to articulate and communicate collective identity is exclusively a modern phenomenon War and Memory at the Time of the Fifth Crusade explores how and why remembering war came to be culturally meaningful during the early thirteenth century By the 1200s discourses of crusading were deeply steeped in the language of memory crusaders understood themselves to be acting in remembrance of Christ's sacrifice and following in the footsteps of their ancestors At the same time the foundational narratives of the First Crusade began to be transformed by vernacular histories and the advent of crusading romance Examining how the Fifth Crusade was remembered and commemorated during its triumphs and immediately after its disastrous conclusion Cassidy Welch brings a nuanced perspective to the prevailing historiography on war memory showing that remembering war was significant and meaningful centuries before the advent of the nation state This thoughtful and novel study of the Fifth Crusade shows it to be a key moment in the history of remembering war and provides new insights into medieval communication It will be invaluable reading for scholars interested in the Fifth Crusade medieval war memory and the use of war memory Devotion to the Name of Jesus in Medieval English Literature, c. 1100 - c. 1530 Denis Renevey, 2022-08-01 Devotion to the Name of Jesus in Medieval English Literature c 1100 c 1530 offers a broad but detailed study of the practice of devotion to the Name of Jesus in late medieval England It focuses on key texts written in Latin Anglo Norman and Middle English that demonstrate the way in which devotion moved from monastic circles to a lay public in the late medieval period It argues that devotion to the Name is a core element of Richard Rolle's contemplative practice although devotion to the Name circulated in trilingual England at an earlier stage The volume investigates to what extent the 1274 Second Lyon Council had an impact in the spread of the devotion in England and beyond It also offers illuminating evidence about how Margery Kempe and her scribes used devotion how Eleanor Hull made it an essential component of her meditative sequence seven days of the week and how Lady Margaret Beaufort worked towards its instigation as an official feast **Hostile Business and the Sovereign State** Michael J. Strauss, 2018-12-14 This book describes and assesses an emerging threat to states territorial control and sovereignty the hostile control of companies that carry out privatized aspects of sovereign authority The threat arises from the massive worldwide shift of state activities to the private sector since the late 1970s in conjunction with two other modern trends the globalization of business and the liberalization of international capital flows The work introduces three new concepts firstly the rise of companies that handle privatized activities and the associated advent of post government companies that make such activities their core business Control of them may reside with individual investors other companies or investment funds or it may reside with other states through state owned enterprises or sovereign wealth funds Secondly imperfect privatizations when a state privatizes an activity to another state's public sector The book identifies cases where this is

happening It also elaborates on how ownership and influence of companies that perform privatized functions may not be transparent and can pass to inherently hostile actors including criminal or terrorist organizations Thirdly belligerent companies whose conduct is hostile to those of states where they are active The book concludes by assessing the adequacy of existing legal and regulatory regimes and how relevant norms may evolve

Creative Ways of Knowing in Engineering Diana Bairaktarova,Michele Eodice,2016-12-29 This book offers a platform for engineering educators who are interested in implementing a creative ways of knowing approach to presenting engineering concepts The case studies in this book reveal how students learn through creative engagement that includes not only design and build activities but also creative presentations of learning such as composing songs writing poems and short stories painting and drawing as well as designing animations and comics Any engineering educator will find common ground with the authors who are all experienced engineering and liberal arts professors who have taken the step to include creative activities and outlets for students learning engineering

Unrivaled Michael C. Beckley,2018-09-15 No detailed description available for *Unrivaled*

Citizen Science Susanne Hecker,Muki Haklay,Anne Bowser,Zen Makuch,Johannes Vogel,Aletta Bonn,2018-10-15 Citizen science the active participation of the public in scientific research projects is a rapidly expanding field in open science and open innovation It provides an integrated model of public knowledge production and engagement with science As a growing worldwide phenomenon it is invigorated by evolving new technologies that connect people easily and effectively with the scientific community Catalysed by citizens wishes to be actively involved in scientific processes as a result of recent societal trends it also offers contributions to the rise in tertiary education In addition citizen science provides a valuable tool for citizens to play a more active role in sustainable development This book identifies and explains the role of citizen science within innovation in science and society and as a vibrant and productive science policy interface The scope of this volume is global geared towards identifying solutions and lessons to be applied across science practice and policy The chapters consider the role of citizen science in the context of the wider agenda of open science and open innovation and discuss progress towards responsible research and innovation two of the most critical aspects of science today
