Matteo Di Tullio,Anna Maria Stagno,Martino Lorenzo Fagnani,2025-11-28 Bringing together a broad range of case studies from across Europe this book explores practices implemented to promote the sustainable use of environmental resources from the 16th century until the turn of the 21st century How and with what results environmental resources were managed in the past is one of the main topics of debate in rural and environmental history and archaeology This book explores the dialogue between these fields drawing upon new studies and comparisons between grammars concepts and research practices from both fields to promote an interdisciplinary approach to the study of the environment The book provides a comprehensive overview and comparison of the different practices of environmental resources management in Europe from the early modern period to contemporaneity shedding light on a range of sustainability issues including land management water supply farming systems and forestry The interdisciplinary contributions in this volume provide original insight based on an analysis of written and material sources examining a range of different regions including northern Italy Slovenia northern Spain southern Spain south western France and northern Romania This book will be of interest to students and scholars of history and archaeology as well as to those in research fields related to anthropology sociology environmental and agricultural sciences and economics *Governance for Mediterranean Silvopastoral Systems* Teresa Pinto-Correia,Maria Helena Guimarães,Gerardo Moreno,Rufino Acosta Naranjo,2021-10-01 This book is about the resilience of silvo pastoral systems now and in the future As such it is about people The goal is to fill the gap in the knowledge on silvo pastoral systems

Conservation's Roots Abigail P. Dowling, Richard Keyser, 2020-06-11 The ideas and practices that comprise conservation are often assumed to have arisen within the last two centuries However while conservation today has been undeniably entwined with processes of modernity its historical roots run much deeper Considering a variety of preindustrial European settings this book assembles case studies from the medieval and early modern eras to demonstrate that practices like those advocated by modern conservationists were far more widespread and intentional than is widely acknowledged As the first book length treatment of the subject Conservation's Roots provides broad social historical and environmental context for the emergence of the nineteenth century conservation movement
