**An Introduction to European Law** Robert Schutze, 2023 *European constitutional law network series*, 2002 The Emergence of a European Constitutional Law Liisa Nieminen, Mark L'vovich Ėntin, Rainer Arnold (Professor of public law), Ralph Alexander Lorz, International Academy of Comparative Law, 2006 **EU Constitutional Law** Allan Rosas, Lorna Armati, 2018-05-17 What constitution arose by any other name An elephant that cannot be defined what the EU is and is not Marking the territory principles governing union competences Who is the boss in search of a master of the treaties Looking past the trees to see the wood construing a hierarchy of norms Into the estuaries and up the rivers union law in the national legal orders of the member states A lot more than Brussels bureaucrats the institutional framework A suprematist composition differentiation and flexibility What deficit the EU system of democracy Civis Europeus Sum the evolving concept of union citizenship Taking rights more seriously the EU system of fundamental rights Broadening horizons the area of

freedom security and justice The internal market liberal social or green Building a house by starting with the roof economic and monetary policy EU external relations an elephant trumpeting loud and clear or a gaggle of geese Covenants of no strength to secure a man at all issues of enforcement and control The elephant in the room concluding remarks **La Nouvelle Constitution Européenne** Jacques Ziller, 2005-01-01 This remarkable book offers a first in depth analysis of the Treaty establishing a Constitution for Europe As the author constitutional law expert Jacques Ziller notes the new Constitution is in many ways a grand integration of elements from existing European law most importantly from the case law of the European Court of Justice yet at the same time the new text features groundbreaking innovations with far reaching implications for the future of Europe Combining legislative history acute insight rigorous analysis and detailed supplementary information The European Constitution elucidates the genesis growth and future implications of the EU s constitutional development The Constitution of the European Union Ulrich Haltern, 2025-01-23 This book provides a contextual analysis of the constitution of the European Union which unlike most constitutions does not belong to a state Rather the EU is an international organisation that has moved beyond the features of international law into a terrain very close to the municipal law of federal states Many features we take for granted in nation states are non existent or contested in the Union There is no European Union constitutional text in the proper sense the Constitutional Treaty signed by the Member States in 2004 failed spectacularly in the process of popular ratification The Union s founding texts were international treaties international law not constitutional law And yet over time legal doctrine put into place by the European Court of Justice in Luxembourg has led to constitutional attributes of Union law and political practice led by the Commission has mirrored these attributes complementing a de facto constitutionalist environment As a consequence we have seen a steady re ordering of the functional boundaries of the Member States followed by a nascent re ordering of the imagined boundaries of political community and self All of this is constitutionalism writ large legal doctrines institutional arrangements political practices and their implications for legitimacy democracy and political self imagination and together they form the subject of this fascinating book The European Constitution and the Courts Franz C. Mayer, 2003 **Constitutional Review in Europe** Maartje De Visser, 2014-07-18 Constitutions serve to delineate state powers and enshrine basic rights Such matters are hardly uncontroversial but perhaps even more controversial are the questions of who should uphold s the Constitution and how constitutional review is organised These two questions are the subject of this book by Maartje de Visser which offers a comprehensive comparative analysis of how 11 representative European countries answer these questions as well as a critical appraisal of the EU legal order in light of these national experiences Where possible the book endeavours to identify Europe s common and diverse constitutional traditions of constitutional review The *raison d'être* jurisdiction and composition of constitutional courts are explored and so too are core features of the constitutional adjudicatory process Yet this book also deliberately draws attention to the role of non judicial actors in upholding the Constitution as well as the

complex interplay amongst constitutional courts and other actors at the national and European level The Member States featured are Belgium the Czech Republic Finland France Germany Italy Hungary the Netherlands Spain Poland and the United Kingdom This book is intended for practitioners academics and students with an interest in European constitutional law
