Academic Language in Diverse Classrooms: Mathematics, Grades K–2 Margo Gottlieb, Gisela Ernst-Slavitz, 2013-03-12
Help your students unlock important mathematical concepts. If you've ever watched a student struggle with learning math concepts, you know that academic English can sometimes create stumbling blocks to understanding. To grasp complicated concepts, build skills, and demonstrate achievement, students need to master academic language in math. But how do you teach academic language when you're so busy teaching math? With this guide, you'll build a curricular framework that integrates language and cultural supports with math content during lesson planning, implementation, and reflection. You'll learn to understand the role of language within the math principles of the Common Core, identify potential obstacles to understanding, incorporate academic language into standards-referenced unit targets and lesson objectives, collaborate with ELL specialists to help students access the curriculum. Each grade-specific chapter models the types of interactions and learning experiences that help students master both math content and academic language. This essential book shows you why mastery of academic language is the key to students' academic success.

What Every Principal Needs to Know to Create Equitable and Excellent Schools George Theoharis, Jeffrey S. Brooks, 2015-04-25
School leaders who succeed at creating a high-achieving learning community must also be committed to creating an equitable environment for all students. In this new book, key scholars across the content areas show how to put into practice a commitment to equity and excellence across the Pre-K-12 spectrum. Readers learn directly from experts in each of the content domains: literacy, mathematics, science, social studies, music, early childhood, special education, English language learners, world languages, and physical education. How a commitment to social justice and equity can be grounded in core subject areas, why each has a place in the school, and what they need to know and do in each subject area. This book is a critical instructional leadership resource for new and veteran principals who want to see all students succeed. Contributors: Antonio J. Castro, Julie Causton, Theoharis, Virginia Collier, Katherine Delaney, Catherine Ennis, Virginia Goatley, Beth Graue, Rochelle Gutierrez, Kathleen A. Hinchman, Anne Karabon, Christi Kasa, Dave McAlpine, Mitchell Robinson, Victor Sampson, Sherry A. Southerland, and Wayne Thomas.

Advanced Common Core Math Explorations Jerry Burkhart, 2021-09-03
Students become mathematical adventurers in these challenging and engaging activities designed to deepen and extend their understanding of concepts from the Common Core State Standards in Mathematics. The investigations in this book stretch students' mathematical imaginations to their limits as they create and manipulate geometric figures, draw and analyze complex designs, and develop and apply measurement strategies to solve challenging real-world and mathematical problems. Each activity comes with extensive support for classroom implementation, including learning goals, discussion guides, detailed solutions, and suggestions for extending the investigation. There is also a free supplemental e-book offering strategies for motivation, assessment, parent communication, and suggestions for using the materials in different learning environments. Grades 5–8

Over-Tested and

Under-Prepared Bob Sornson,2022-11-23 Pressured by standardized testing and rigid pacing guidelines many schools are forced to cover too much content too quickly without being able to meet the needs of individual students In this powerful book from acclaimed author and presenter Bob Sornson you ll learn how shifting from curriculum based instruction to competency based personalized learning can help students become more successful confident and engaged learners Each chapter is easy to digest and provides compelling research strategies and anecdotes to inspire conversation and action This second edition provides updated statistics and examples of schools successfully using competency based learning models to help you bring about meaningful change Teachers administrators and community leaders will all find practical resources and a clear rationale for transforming our current educational system into a new dynamic model of teaching and learning
