Matrix Theory Hassan Yasser,2018-08-29 This book reviews current research including applications of matrices spaces and other characteristics It discusses the application of matrices which has become an area of great importance in many scientific fields The theory of row column determinants of a partial solution to the system of two sided quaternion matrix equations is analyzed It introduces a matrix that has the exponential function as one of its eigenvectors and realizes that this matrix represents finite difference derivation of vectors on a partition Mixing problems and the corresponding associated matrices have different structures that deserve to be studied in depth Special compound magic squares will be considered Finally a new type of regular matrix generated by Fibonacci numbers is introduced and we shall investigate its various topological properties **Finite Fields and Applications** Dieter Jungnickel,H. authors the book is of interest to a wide range of mathematicians whose research areas include summability and approximation theory One of the most active areas of research in summability theory is the concept of statistical convergence which is a generalization of the familiar and widely investigated concept of convergence of real and complex sequences and it has been used in Fourier analysis probability theory approximation theory and in other branches of mathematics The theory of approximation deals with how functions can best be approximated with simpler functions In the study of approximation of functions by linear positive operators Bernstein polynomials play a highly significant role due to their simple and useful structure And during the last few decades different types of research have been dedicated to improving the rate of convergence and decreasing the error of approximation **The Sciencebook** Matthias Delbrück,2008 A comprehensive visual reference offering facts from all major fields of science is organized into six sections the universe planet Earth biology chemistry physics and mathematics and includes timelines sidebars and cross references **Multidisciplinary Research in Arts, Science & Commerce (Volume-22)** Chief Editor- Biplab Auddya, Editor- Dr. K.
