Earth Fire Water Air:

Fractalize That! : A Visual Essay On Statistical Geometry John Shier, 2018-11-22 *Fractalize That A Visual Essay on Statistical Geometry* brings a new class of geometric fractals to a wider audience of mathematicians and scientists It describes a recently discovered random fractal space filling algorithm Connections with tessellations and known fractals such as Sierpinski are developed And the mathematical development is illustrated by a large number of colorful images that will charm the readers The algorithm claims to be universal in scope in that it can fill any spatial region with smaller and smaller fill regions of any shape The filling is complete in the limit of an infinite number of fill regions This book presents a descriptive development of the subject using the traditional shapes of geometry such as discs squares and triangles It contains a detailed mathematical treatment of all that is currently known about the algorithm as well as a chapter on software implementation of the algorithm The mathematician will find a wealth of interesting conjectures supported by numerical computation Physicists are offered a model looking for an application The patterns generated are often quite interesting as abstract art Readers can also create these computer generated art with the advice and examples provided
