Earth Ethics Ecology And Justice:

Earth Ethics Martin-Schramm, James, Stivers, Laura, Spencer, Daniel, 2015-11-01 This valuable classroom resource explores a number of issues in social and environmental ethics and provides resources for engaging in ethical reflection about them Nine cases explore issues like population growth material consumption and climate change water rights and species conservation genetic engineering and food security in Sub Saharan Africa hydraulic fracturing and greenhouse gas reduction options and mountaintop coal removal mining and fossil fuel divestment Utilizing the tried and true case method approach pioneered by the Harvard Business School the case studies present material in a clear and relevant fashion and allow instructors to select discrete issues for study and discussion **Earth Community, Earth Ethics** Larry L. Rasmussen, 1996 In this important new book social ethicist Larry Rasmussen lays the foundations for an approach to faith and ethics appropriate to a community of the earth in all its peril and promise *Earth Community Earth Ethics* is a comprehensive treatment that synthesizes insights from religion ethics and environmentalism in a single vision for creating a sustainable community *Earth Community Earth Ethics* is arranged in three parts In the first Rasmussen scans our global situation and brings into relief the extraordinary range of dangers threatening all life on our planet In part two he explores worlds of religion ethics and human symbolism to glean from them the resources for a necessary conversion to earth Finally he sketches a constructive ethic that can guide us out of our present situation While its principle focus is environmental ethics *Earth Community Earth Ethics* builds on the foundations of international discussions of sustainable development and such books as *The Ecology of Commerce* and *Envisioning a Sustainable Society* Rasmussen shows how the environmental predicament underscores a variety of crises afflicting modern industrial society in economics in politics in gender and reproductive relations as well as the debates on the very meaning of life itself **Earth Ethics** James B. Martin-Schramm, Daniel Spencer, Laura A. Stivers, 2015 A revision of the highly successful textbook *Christian Environmental Ethics A Case Method Approach* this volume introduces new topics in environmental ethics including hydraulic fracturing greenhouse gases food consumption and resource stewardship and revisits traditional topics in environmental ethics while expanding beyond a specifically Christian hermeneutic Employing a tried and true method first used at Harvard Business School the authors present material both old and new in a clear and pertinent fashion In addition the structure of the book allows teachers both high school and university to separate out discrete issues for study and discussion **Ecology and Justice—Citizenship in Biotic Communities** David R. Keller, 2019-03-30 This is the first book to outline a basic philosophy of ecology using the standard categories of academic philosophy metaphysics axiology epistemology aesthetics ethics and political philosophy The problems of global justice invariably involve ecological factors Yet the science of ecology is itself imbued with philosophical questions Therefore studies in ecological justice the sub discipline of global justice that relates to the interaction of human and natural systems should be preceded by the study of the philosophy of ecology This book enables

the reader to access a philosophy of ecology and shows how this philosophy is inherently normative and provides tools for securing ecological justice. The moral philosophy of ecology directly addresses the root cause of ecological and environmental injustice: the violation of fundamental human rights caused by the inequitable distribution of the benefits, economies, and costs of industrialism. Philosophy of ecology thus has implications for human rights, pollution, poverty, unequal access to resources, sustainability, consumerism, land use, biodiversity, industrialization, energy policy, and other issues of social and global justice. This book offers an historical and interdisciplinary exegesis. The analysis is situated in the context of the Western intellectual tradition and includes great thinkers in the history of ecological thinking in the West from the natural sciences, social sciences, and humanities. Keller asks the big questions and surveys answers with remarkable detail. Here is an insightful analysis of contemporary classical and ancient thought alike in the ecological sciences, the humanities, and economics: the roots and fruits of our concepts of nature and of being in the world. Keller is unexcelled in bridging the ought gap, bridging nature and culture, and in celebrating the richness of life, its pattern, process, and creativity on our wonderful Earth.

Holmes Rolston III, University Distinguished Professor, Colorado State University, Author of *A New Environmental Ethics: The Next Millennium for Life on Earth* (2012). Mentored by renowned ecologist Frank Golley and renowned philosopher Frederick Ferré. David Keller is well prepared to provide a deep history and a sweeping synthesis of the idea of ecology, including the metaphysical, epistemological, and ethical aspects of that idea, as well as the scientific.

J Baird Callicott, University Distinguished Research Professor, University of North Texas, Author of *Thinking Like a Planet: The Land Ethic and the Earth Ethic* (2013).

Ethics and Justice for the Environment, Adrian Armstrong, 2012-05-31. Examining the issues of ethics and justice as they apply to the environment, this book starts from the observation that the parallel expositions of environmental ethics and environmental justice appear to have few points of contact. Environmental justice is highly politicized and concerned with human access to the environment and the unequal exposure to environmental pollution. It grew out of the US civil rights movement, the liberal tradition of rights, and Rawls' description of justice as fairness. It is thus almost exclusively anthropocentric and does not address the question of justice for the environment. By contrast, environmental ethical studies are a wide-ranging collection of approaches that are concerned with caring for the earth and the justifications for it, but rarely consider the issue of justice. Although the two movements do not come together at the theoretical level, they do so at the grass roots activist level. An essential component of this study is thus to consider both the issues of grass roots action and the application of the methods to actual case studies. This book finds a common ground between these two strands and so to develop a unified statement of justice for the environment that includes the insights of both approaches, particularly based on the capability ideas of justice developed by Martha Nussbaum.

A New Environmental Ethics, Holmes Rolston III, 2012-04-23. No one looking ahead at the middle of the last century could have foreseen the extent and the importance of the ensuing environmental crises. Now more than a decade into the next century,

no one can ignore it A New Environmental Ethics the Next Millennium for Life on Earth offers clear powerful and oftentimes moving thoughts from one of the first and most respected philosophers to write on the environment Rolston an early and leading pioneer in studying the moral relationship between humans and the earth surveys the full spectrum of approaches in the field of environmental ethics This book however is not simply a judicious overview Instead it offers critical assessments of contemporary academic accounts and draws on a lifetime of research and experience to suggest an outlook for the future As a result this focused forward looking analysis will be a necessary complement to any balanced textbook or anthology in environmental ethics and will teach its readers to be responsible global citizens and residents of their landscape helping ensure that the future we have will be the one we wish for *Alternatives Unincorporated* George Zachariah,2015-01-30

The victims of environmental destruction are often sidelined in eco theology and environmental discourse Movements for ecological justice fail to take into account the voice of those at the grassroots *Alternatives Unincorporated* presents an environmental ethics that begins with those on the margins Using the key example of the Narmada Dam in India and the popular resistance movement which built up against the project the book examines the collective action of subaltern communities in caring for their local environment The book frames these movements as theological texts that inform a life affirming earth ethics The aim of the book is to challenge prevailing social and ecological dynamics and to affirm the interconnectedness of social justice and environmental action **Missionalia** ,2008 **The Future of Ethics** Willis Jenkins,2013-10-28

The Future of Ethics interprets the big questions of sustainability and social justice through the practical problems arising from humanity s increasing power over basic systems of life What does climate change mean for our obligations to future generations How can the sciences work with pluralist cultures in ways that will help societies learn from ecological change Traditional religious ethics examines texts and traditions and highlights principles and virtuous behaviors that can apply to particular issues Willis Jenkins develops lines of practical inquiry through prophetic pragmatism an approach to ethics that begins with concrete problems and adapts to changing circumstances This brand of pragmatism takes its cues from liberationist theology with its emphasis on how individuals and communities actually cope with overwhelming problems Can religious communities make a difference when dealing with these issues By integrating environmental sciences and theological ethics into problem based engagements with philosophy economics and other disciplines Jenkins illustrates the wide understanding and moral creativity needed to live well in the new conditions of human power He shows the significance of religious thought to the development of interdisciplinary responses to sustainability issues and how this calls for a new style of religious ethics **Islamic Law** Abdul Haseeb Ansari,2007 **Earth Habitat** Dieter T. Hessel,Larry L. Rasmussen, This signal volume gathers theologians from around the world to address three pressing questions How can Christianity and Christian churches rethink themselves and their roles in light of the endangered earth What earth honoring elements does justice oriented Christianity have to contribute to the common good And how can

local communities and churches respond creatively and constructively on a level to these vast global forces This volume captures the chief themes and presentations from the October 1998 conference on social justice ecology and church entitled Ecumenical Earth and held at Union Theological Seminary Among the 18 contributors to this trailblazing conference are Rasmussen and Hessel James Cone Kusumita Pedersen Brigitte Kahl Ibrahim M Abu Rabi Steven Rockefeller Havid Hallman Ernst Conradie Peggy Shepard and Troy Messenger

The Integrated Protestant Ethic and the Spirit of Environmentalism S. Steiner-Aeschliman, 1999 The theory and data of environmental science suggest that growth in rates of population consumption and environmental degradation as a result of the activities of industrialized societies has created an ecological crisis to which modern societies must adapt However adaptation is problematic Max Weber studied adaptive social change during the industrial revolution The evolution of this new way of life was initially problematic because individuals who established industrialism were socialized under feudalism In this dissertation I consider The Protestant Ethic and the Spirit of Capitalism as a theoretical treatise framed by modern human ecology in order to study social change in the context of the ecological crisis of industrialism The Protestant Ethic is known for describing how religious ideas influenced the unfolding of modern capitalism in the West However there is nothing inherent in Protestantism that requires linkage to industrialism I argue that Protestantism has evolved and that it need not necessarily promote environmental exploitation although under industrialism it has I identify a green subculture within Protestantism and consider how Protestantism's weakness may also be its strength The very sociological structure that in the absence of ecologically realistic norms permits widespread ecosystem degradation by industrial capitalism may also generate ecologically realistic norms for a natural capitalism Weber contended that rationality was problematic because it paradoxically results in a dual crisis of management and meaning where human agency becomes imprisoned as if in an iron cage The irrational continuation of environmentally degrading social practices eventually contributes to a legitimation crisis People turn to religion as an alternative authority If science and religion converge on environmental values they might catalyze social change unless they are too distorted by ideological bias Adaptive social change only occurs if ethical and ecological values are in accordance with the sustainability of ecosystems Hence to adapt to the ecological crisis sociocultural systems require socialization into ecological realism because ecologically rational societies may still be maladaptively organized around environmentally unsustainable trajectories

Routledge Handbook of Religion and Ecology Willis J. Jenkins, Mary Evelyn Tucker, John Grim, 2016-07-22 The moral values and interpretive systems of religions are crucially involved in how people imagine the challenges of sustainability and how societies mobilize to enhance ecosystem resilience and human well being The Routledge Handbook of Religion and Ecology provides the most comprehensive and authoritative overview of the field It encourages both appreciative and critical angles regarding religious traditions communities attitude and practices It presents contrasting ways of thinking about religion and about ecology and about ways of connecting the two terms Written by a team of leading

international experts the Handbook discusses dynamics of change within religious traditions as well as their roles in responding to global challenges such as climate change water conservation food and population It explores the interpretations of indigenous traditions regarding modern environmental problems drawing on such concepts as lifeway and indigenous knowledge This volume uniquely intersects the field of religion and ecology with new directions within the humanities and the sciences This interdisciplinary volume is an essential reference for scholars and students across the social sciences and humanities and for all those looking to understand the significance of religion in environmental studies and policy

Justice and Peace Milburn J. Thompson, 2015-03-31 *International Mission Bibliography* Norman E. Thomas, 2003-10-16 This massive reference is the key to finding the most important works on missiology published from 1960 2000 Representing the research of more than 30 sub editors in mission related disciplines including history theology social aspects education evangelism spirituality and political life and includes sections on Africa the Americas Asia Europe and Oceania Complete publication details and ISBNs are given for each entry

Ecological Justice and the Extinction Crisis Anna Wienhues, 2020-10-07 ePDF and ePUB available Open Access under CC BY NC ND licence As the biodiversity crisis deepens Anna Wienhues sets out radical environmental thinking and action to respond to the threat of mass species extinction The book conceptualises large scale injustice endangering non humans and signposts new approaches to the conservation of a shared planet Developing principles of distributive ecological justice it builds towards a bold vision of just conservation that can inform the work of policy makers and activists This is a timely original and compelling investigation into ethics in the natural world during the Anthropocene and a call for biocentric ecological justice before it is too late

Christianity and Ecological Theology E. M. Conradie, 2006-10-01 There has been a proliferation of publications in the field of Christian ecological theology over the last three decades or so These include a number of recent edited volumes each covering a range of topics and consolidating many of the emerging insights in ecological theology The call for Christian churches to respond to the environmental crisis has been reiterated numerous times in this vast corpus of literature also in South Africa

Theology for Earth Community Dieter T. Hessel, 2003-08-18 This volume brings together original essays by both seasoned professionals and emerging scholars who examine state of the art scholarship and pedagogy in ecologically alert theology Authors assess what various theologians have to offer and draw implications for reshaping religious and environmental studies as well as preparing the next generations of church leaders or pastoral workers What needs to be done these authors ask to bring biblical studies systematics social ethics practical theology spiritual formation and liturgy up to speed with eco justice thought and action on environmental questions

Development and Justice Rajula Annie Watson, 2004 Restoring the health of the land is indispensable not only because it is the ground of our sustenance and survival but also land has in itself the inherent worth This book challenges humanity s indulgence and activities of development science and technology and insists for human responsibility and moral duties towards the land the sustaining

mother earth which is abused ransacked of its wealth and ignored of its intrinsic value The study attempts to bring together perspectives and values that are important for preserving the rights of the land and proposes the contour of a land ethic
