guide contains six chapters of diverse resources that are directly relevant to middle school science. Among these is a chapter on educational software and multimedia programs, chapters on books about science and teaching, directories and guides to science trade books and periodicals for teachers and students. Another section features institutional resources. One chapter lists about 600 science centers, museums, and zoos where teachers can take middle school students for interactive science experiences. Another chapter describes nearly 140 professional associations and U.S. government agencies that offer resources and assistance. Authoritative, extensive, and thoroughly indexed, and the only guide of its kind, *Resources for Teaching Middle School Science* will be the most used book on the shelf for science teachers, school administrators, teacher trainers, science curriculum specialists, advocates of hands-on science teaching, and concerned parents.

An Explorer's Guide to the Earth System Ellen Metzger, 2003 This book provides readers with an Earth system perspective and engages them in active learning and inquiry about their home planet. It contains readings, questions, and exercises that will cultivate a greater appreciation for the planet Earth and its inhabitants and demonstrate how relevant Earth Science is to our lives and communities. Recurring themes: interactions of spheres, scale, cycles, energy. Humans and the Earth system are woven throughout the five chapters, which cover an introduction to the Earth system, geosphere, hydrosphere, atmosphere, and cosmosphere. For anyone who wants to explore the science of the Earth.

Visualizing Earth Science Zeeya Merali, Brian J. Skinner, 2012-04-23 Visualizing Earth Science relies heavily on rich visuals to expand on concepts for students and solidify their understanding of them. This accessible format, coupled with the assumption that students have little knowledge of earth science, allows students to navigate through the material with greater ease, the goal being to help them understand the world around them and interpret what they see in a meaningful, accurate, and exciting way. Authors Zeeya Merali and Brian Skinner focus on visual learning in their debut of their first edition, *Visualizing Earth Science*. This text weaves illustrated timelines throughout to exemplify how concepts fit together and develop over time. Students will quickly learn difficult concepts with this innovative visual approach.
