Economics And Politics Of Trade Policy World Scientific Studies In International Economics:

Economics and Politics of Trade Policy Douglas R. Nelson, 2014-01-21 *Economics and Politics of Trade Policy* brings together a set of 16 papers that focus primarily on the political economy of international trade. What sets these papers apart is the recurrent theme of developing and extending political economic analysis beyond details commonly considered when the papers were written. The book takes a deeper look at institutional and behavioral details that researchers have formerly overlooked, delving into issues such as administered rather than legislated protection, incorporation of unemployment and behavioral considerations such as fairness. Together with a few other papers that consider theoretic issues of trade, this book will provide a thought-provoking overview of the most important research on international trade, political economy, and policy over the past decades.

The Political Economy of International Trade Edward D. Mansfield, 2015-07-03 This volume includes many of Edward D. Mansfield's contributions to research on the political economy of trade. Among the topics addressed are the effects of power relations and international economic institutions on trade flows, the influence of domestic politics on trade policy, the factors that shape the mass public's attitudes toward trade, and the determinants of the formation and expansion of international trade agreements. *The Political Economy of International Trade* is an essential reference for scholars and graduate students interested in the international political economy. Contents: Systemic Approaches to the International Trading System; The Concentration of Capabilities and International Trade; Power Politics and International Trade; Alliances, Preferential Trading Arrangements, and International Trade; International Institutions and the Volatility of International Trade; The Political Economy of Trade Policy and Trade Attitudes; The Political Economy of Nontariff Barriers; A Cross-National Analysis; Free to Trade: Democracies, Autocracies, and International Trade; Votes and Vetoes; The Political Determinants of Commercial Openness; Support for Free Trade; Self-Interest, Sociotropic Politics, and Out-Group Anxiety; The Political Economy of Preferential Trading Agreements; The Proliferation of Preferential Trading Arrangements; Why Democracies Cooperate; More Electoral Control and International Trade Agreements; Vetoing Cooperation: The Impact of Veto Players on Preferential Trading Arrangements; Multilateral Determinants of Regionalism; The Effects of GATT/WTO on the Formation of Preferential Trading Arrangements; The Expansion of Preferential Trading Arrangements. Readership: Postgraduate researchers, academics, and policymakers interested in international political economics. Key Features: Covers a much broader range of topics than other competing titles; Addresses the international influences on trade flows, the domestic influences on both trade flows and trade policy, and how individuals in the United States perceive trade; and also addresses the international and domestic influences on trade agreements between countries. The author and his co-authors are among the most prominent scholars of international political economy. Keywords: Political Economy, International Trade, Globalization.

The Political Economy of Trade Policy Devashish Mitra, 2016-03-11 *The Political Economy of Trade Policy: Theory, Evidence, and Applications* is a collection of sole-authored and co-authored papers by Devashish Mitra that have been

published in various scholarly journals over the last two decades It covers diverse topics in the political economy of trade policy ranging from the role of modeling lobby formation in the context of trade policy determination to its applications to the question of unilateralism versus reciprocity and trade agreements It also includes the theory and the empirics of the choice of policy instruments Finally the book presents the empirical investigation of the Grossman Helpman Protection for Sale model as well as the Mayer Median Voter model of trade policy determination **World Scientific Reference On**

Asia-Pacific Trade Policies (In 2 Volumes) Kym Anderson, 2019-12-19 Protectionism has been placed under the media spotlight with news headlines generated by populist anti globalization movements and Donald Trump's term as US President Such a policy stance is putting at risk unilateral trade reform efforts in the Asia Pacific region and elsewhere This two volume reference work provides a timely update on how far the region has come in opening markets It analyzes the motivations or ostensible objectives of policies adopted in the past the changing extent of the domestic price distortions involved the economic effects of those policies at home and abroad the political economy forces at work that brought about those policies and their subsequent reform their consequences for international trade economic welfare and poverty alleviation and prospects for sustainable improvements in current policies Case studies of major East Asian economies and Australia reveal how government priorities to assist farmers versus manufacturers changed over the past century but especially since the 1980s and how that has affected trade between natural resource poor and resource rich economies This set is highly recommended for those who are interested in the economics and politics of trade policies agricultural economics economic development and food and nutrition security in the Asia Pacific region and beyond International Trade Policy Formation

Wolfgang Mayer, 2013 Specifically it explores the robustness of the Heckscher Ohlin framework and its two core propositions the Stolper Samuelson and Rybczynski theorems by relaxing its underlying assumptions in four ways limiting the inter industry mobility of factors of production in the short run allowing for industry economies of scale introducing uncertainty of commodity prices and endogenizing a country's supply of labor Part II addresses issues related to first best trade policies which had gained prominence during the period of multilateral trade liberalization under the auspices of the GATT such as the scope and limits of negotiated tariff agreements first best policy justifications for import restrictions and export promotions and the use of import quality standards as a substitute for tariffs Part III explores the political economy of trade policy formation *Floating World, The: Issues In International Trade Theory* Wilfred J Ethier, 2014-05-21 In The Floating

World Emeritus Professor of Economics Wilfred Ethier collates 22 papers that delve deep into the study on International Trade Theory These papers are grouped into six distinct sections Each covers an overarching research program in trade theory Factor Endowments Theory Economies of Scale International Factor Markets Regional Integration the Political Economy of Trade Policy and Administered Protection An additional section for important papers outside of those programs is also included With papers originally written in the 1970s all the way up to recent times Ethier provides contemporary

commentary for each section referring to further sources candid accounts on the state of international trade theory at the time and how each paper contributed to further improvements of their respective research program

Globalization and International Trade Policies Robert Mitchell Stern, 2009 This book brings together a collection of papers that Robert M Stern and his co authors have written in recent years The collection addresses a variety of issues pertinent to the global trading system One group of papers deals with globalization in terms of what the public needs to know about this phenomenon and the role of the World Trade Organization WTO whether some countries may be hurt by globalization how global market integration relates to national sovereignty and how and whether considerations of fairness are and should be dealt with in the global trading system and WTO negotiations A second group of papers consists of analytical and computational modeling studies of multilateral regional and bilateral trading arrangements and negotiations from a global and national perspective for the United States and other major trading countries The remaining papers include an empirical analysis of barriers to international services transactions and the consequences of liberalization and issues of international trade and labor standards
