Sustainable Food Networks: Chains of Values and Food Transitions Carolina Yacamán-Ochoa,José Luis Sánchez-Hernández ,Javier Sanz-Cañada,2025-06-12 Sustainable Food Networks SFNs are emerging as pivotal value chains for agroecological and food transitions in both urban and rural territories These networks aim to create a healthy fair localized and inclusive food supply model standing in contrast to the dominant corporate food system characterized by long haul complex and fragile supply chains Despite their potential SFNs such as community supported agriculture farmers markets and urban agriculture have not been thoroughly examined through the lens of economic geography and related interdisciplinary perspectives The current globalized food system is fraught with economic social and environmental issues including the marginalization of family farming environmental degradation and the loss of local knowledge and biodiversity SFNs offer a critical alternative by emphasizing small batch production environmental sustainability and social equity yet there remains a significant gap in understanding their full impact and potential This research topic aims to collate comprehensive research on Sustainable Food Networks SFNs with specific objectives identifying various SFN initiatives across different territories evaluating their spatial dimensions in global contexts and assessing policies that can enhance the social economic and environmental sustainability of food value chains Key questions include how alternative values are propagated within SFNs the critical spatial nodes for these values the role of urban and peri urban agriculture and the interplay between territorial conditions and SFN performance Additionally the research seeks to understand how SFNs compete with hegemonic value chains and the potential role of public policy in strengthening these networks To gather further insights into the complexities and potentials of SFNs we welcome articles addressing but not limited to the following themes The propagation and transfer of alternative values within SFNs Identification of critical spatial nodes for the reproduction of these values Roles of urban and peri urban agriculture in SFNs

Relationships between territorial conditions governance and SFN performance Strategies employed by SFNs to tackle competition from corporate value chains The impact of SFNs on the surge of local organic and healthy food outlets The role of public policy in supporting and strengthening SFNs **Ecohealth Research in Practice** Dominique F.

Charron,2011-11-25 This book is about doing innovative research to achieve sustainable and equitable change in people s health and well being through improved interactions with the environment It presents experiences from the field of ecosystem approaches to health or ecohealth research and some insights and lessons learned It builds on previous literature notably Forget 1997 Forget and Lebel 2001 Lebel 2003 and Waltner Toews et al 2008 Through case studies and other contributions by researchers supported by Canada s International Development Research Centre IDRC the book presents evidence of real changes in conditions of people their health and the ecosystems that support them These changes were derived from applications of an ecosystem approach to health in developing regions of the world The book also illustrates the resulting body of applied participatory and action research that improved health and environmental management in developing countries and in many cases influenced policies and practices Ecosystems and Human Health Richard B. Philp,2016-04-19 Renamed to reflect the expanded scope of the second edition Ecosystems and Human Health Toxicology and Environmental Hazards builds on the foundation created by the author in the first edition Environmental Hazards and Human Health Written in a journalistic easily accessible style this book bridges the gap between toxicology and environmental sciences by exploring man made and natural hazards and the risks they pose to wildlife and human health See what s new in the Second Edition Coverage of environmental hormone disrupters Section on Multiple Chemical Sensitivity Expanded discussion of the controversy over genetically modified foods New information on mechanisms of action of marine venoms and poisons Ecosystems and Human Health Toxicology and Environmental Hazards Second Edition explores the broad range of environmental and human health aspects of chemical and biological hazards The author covers the basic principles of pharmacology and toxicology as well as risk analysis air and water pollution and various toxicants hazards and poisons He presents numerous examples of the intimate relationship between ecosystem health and human health and of the need to consider this relationship whenever human activities are likely to have a significant environmental impact
