Ecovillages Lessons For Sustainable Community:

Ecovillages Karen T. Litfin, 2014-01-15 In a world of dwindling natural resources and mounting environmental crisis who is devising ways of living that will work for the long haul And how can we as individuals make a difference To answer these fundamental questions Professor Karen Litfin embarked upon a journey to many of the world's ecovillages intentional communities at the cutting edge of sustainable living From rural to urban high tech to low tech spiritual to secular she discovered an under the radar global movement making positive and radical changes from the ground up In this inspiring and insightful book Karen Litfin shares her unique experience of these experiments in sustainable living through four broad windows ecology economics community and consciousness or E2C2 Whether we live in an ecovillage or a city she contends we must incorporate these four key elements if we wish to harmonize our lives with our home planet Not only is another world possible it is already being born in small pockets the world over These micro societies however are small and time is short Fortunately as Litfin persuasively argues their successes can be applied to existing social structures from the local to the global scale providing sustainable ways of living for generations to come You can learn more about Karen's experiences on the Ecovillages website <http://ecovillagebook.org>

Urban Eco-Communities in Australia

Liam Cooper, Hans A. Baer, 2018-06-28 This book offers one of the first detailed anthropological studies of emergent ecotopianism in urban contexts Engaging directly with debates on urbanisation sustainability and utopia it presents two detailed ethnographic case studies of inner urban Australian eco communities in Adelaide and Melbourne These novel responses to the ecological crisis real social laboratories that attempt to manifest a vision of the eco city in microcosm offer substantial new insights into the concept and creation of sustainable urban communities their attempts to cultivate ways of living that are socially and ecologically nourishing and their often fraught relationship to the capitalist city beyond These studies also suggest the opportunities and limitations of moving beyond demonstration projects towards wider urban transformation as well as exposing the problems of accessibility and affordability that thwart further urban eco interventions and the ways that existing projects can exacerbate issues of gentrification and privilege in a socially polarised city Amidst the challenges of the capitalist city climate change and ecological crisis this book offers vital lessons on the potential of urban sustainability in future cities

Ethnographies of Collaborative Economies across Europe

Penny Travlou, Luigina Ciolfi, 2022-12-30 Sharing economy and collaborative economy refer to a proliferation of initiatives business models digital platforms and forms of work that characterise contemporary life from community led initiatives and activist campaigns to the impact of global sharing platforms in contexts such as network hospitality transportation etc Sharing the common lens of ethnographic methods this book presents in depth examinations of collaborative economy phenomena The book combines qualitative

research and ethnographic methodology with a range of different collaborative economy case studies and topics across Europe. It uniquely offers a truly interdisciplinary approach. It emerges from a unique long term multinational cross European collaboration between researchers from various disciplines e.g. sociology, anthropology, geography, business studies, law, computing, information systems, career studies and epistemological backgrounds brought together by a shared research interest in the collaborative economy. This book is a further contribution to the in depth qualitative understanding of the complexities of the collaborative economy phenomenon. These rich accounts contribute to the painting of a complex landscape that spans several countries and regions and diverse political, cultural and organisational backdrops. This book also offers important reflections on the role of ethnographic researchers and on their stance and outlook that are of paramount interest across the disciplines involved in collaborative economy research.

Handbook of Nature-Based Solutions to Mitigation and Adaptation to Climate Change Gustavo J. Nagy, Desalegn Yayeh Ayal, 2025-11-04

Over recent years nature based solutions (NbS) have gained popularity as tools to ameliorate the effects of climate change while slowing down the global warming process. More specifically, the potential of NbS has been explored in terms of meeting greenhouse gas emissions targets and fostering climate change adaptation. NbS are methods that use and enhance nature to improve social and environmental challenges. They involve several multifaceted actions that work sustainably to restore and protect the natural environment while helping people. Therefore, these solutions are useful in climate change adaptation and mitigation. There are 3 main areas which NbS may target, namely: reducing exposure, reducing sensitivity and supporting adaptive capacity. Reducing exposure refers to protecting areas from existing climate change effects. There is thus a perceived need to document and promote experiences related to NbS and to apply these in different contexts. It is against this background that the *Handbook of Nature Based Solutions to Mitigation and Adaptation to Climate Change* is being produced. The publication will showcase experiences related to NbS from around the world. In particular, it will gather examples of projects, studies and the latest thinking on NbS which can serve the purpose of inspiring and fostering further works in this key area. Thanks to its scope and thematic diversity, the book will be of special interest to representatives from government organisations, researchers and students from a wide range of natural and social sciences courses. It will also provide useful information to practitioners and representatives from non governmental organisations.

Alternating Current – Social Innovation in Community Energy Arwen Colell, 2021-05-10

Community energy projects give their own answers to the challenges of energy system change. They are social innovations. By building new relations between local economies, communities and technical infrastructures, these projects not only change the energy system but also respective power structures. Drawing on case studies from Germany, Denmark and Scotland, this book shows the importance of community ties and shared symbols for successful processes of transformation and develops recommendations for policy decision makers.

Handbook of Gentrification Studies Loretta Lees, Martin Phillips, 2018-04-27

It is now over 50 years since the term gentrification was first

coined by the British urbanist Ruth Glass in 1964 in which time gentrification studies has become a subject in its own right This Handbook the first ever in gentrification studies is a critical and authoritative assessment of the field Although the Handbook does not seek to rehearse the classic literature on gentrification from the 1970s to the 1990s in detail it is referred to in the new assessments of the field gathered in this volume The original chapters offer an important dialogue between existing theory and new conceptualisations of gentrification for new times and new places in many cases offering novel empirical evidence

Community-Owned Transport Leigh Glover,2016-11-03 City and state governments around the world are struggling to achieve environmentally sustainable transport Economic technological city and transport planning and human behaviour solutions are often hampered by ineffective implementation So attention is now turning to institutional governmental and political barriers Approaches to these implementation problems assume that transport ownership can only be public owned by state entities or private corporate or personal Another option largely unexplored to date is communal ownership of transport Community Owned Transport proposes and develops the notion that communal ownership has a historical basis and provides unique opportunities for providing personal mobility It looks at the historical roots of modern urban transport s failings as those of technological change and the associated governing of transport systems particularly the role of public sector institutions Community ownership is explored through the new sharing economy developments car sharing ridesharing and bicycle share schemes and older social innovations in ecovillages and communal living Models and practices of community ownership of transport are provided and this study also discusses how community ownership might contribute to sustainable transport Drawing widely on different disciplines and fields of scholarship this book explores the conceptual and practical aspects of communal ownership of transport It will be a valuable resource for those seeking innovative approaches to addressing the pressing problems of transport including graduate and postgraduate students as well as policymakers practitioners and community groups

Eco-villages and Sustainable Communities Gaia Trust,1991

Ecovillages Jonathan Dawson,2006 In recent years ecovillages local communities which aim to minimise their ecological impact but maximise human wellbeing and happiness have proliferated worldwide This Briefing describes the history and potential of the ecovillage movement

BOOK JACKET

Sustainable Community Graham Stuart Meltzer,2005 This book is about the previously unsubstantiated link between sustainability and community It is based on a ten year investigation of cohousing a popular new type of housing project that directly addresses both environmental degradation and social disintegration The book argues that social and environmental sustainability are inexorably linked Whilst the existence of this link is generally recognised there is little existing literature that offers empirical evidence to prove it In doing so the book uses case study data including 120 photographs 50 tables and 30 diagrams from twelve recent cohousing developments in Canada the USA New Zealand Australia and Japan concrete examples of working sustainable communities The book comprises two parts Part One introduces the twelve cohousing communities projects with distinct attributes of their own that

highlight their diversity and cultural specificity Each is richly illustrated with photographs taken by the author who in addition to being an architect and scholar is a commercial photographer Part Two offers detailed comparative analysis based on substantive quantitative and qualitative data The strands of the analysis are eventually brought together in a holistic or ecological model the Community Empowerment Model The model is then utilised in a broader discussion of empowerment community development and ecologically sustainable development ESD The book is scholarly and authoritative yet accessible to a broad intelligent readership as an illustrated account of a fascinating cultural phenomenon It will be valuable to students of architecture planning sociology community psychology and environmental studies It will also be useful to architects planners and other professionals The book contains in depth information for participants in the growing cohousing ecovillage sustainability and communities movements It is well recognised that such activists face a scarcity of successful examples of sustainable communities from which to draw knowledge and inspiration This book will help fill that void *One Planet Communities* Pooran Desai,2010 Developers local authorities and government all now say we need to create sustainable communities and government legislation is starting to incentivise developers in this direction *Karl Polanyi and the Contemporary Political Crisis* Peadar Kirby,2020-12-10 Has politics reached breaking point Rather than defending liberalism or abandoning it how can a socially just and ecological alternative be built Peadar Kirby investigates the causes of our current multifaceted global crisis by drawing on the work of Karl Polanyi This book explores Polanyi s theory that social disruptions result from the attempt to run society according to the rules of the market Drawing on these ideas it outlines pathways towards an alternative future that overcome weaknesses in Marxism Linking the ecological political and socio economic crises Kirby identifies that an alternative socio ecological model is emerging consistent with the insights of Polanyi *Karl Polanyi and the Contemporary Political Crisis* is an urgent intervention into key debates on the future of politics on the low carbon transition on automation and on the emerging world order *Enhancing Sustainability at the Community Level* Leila Loezer,2011 Sustainability has been a subject of concern in various levels of society Top down approaches proposed by governments corporations and non profit organizations are responsible for implementing policies marketing and organized movements towards environmentally friendly practices and design Grassroots initiatives can also contribute with experiences and encourage local communities to develop and implement strategies to enhance sustainability Many times urban design overlooks the unusual and rich achievements of intentional urban communities and EcoVillages Some of the most successful examples of urban design are the result of grassroots initiatives which many times did not engage the professional services of architects and designers This thesis explores best practices and experiences of grassroots initiatives to make the urban environment more sustainable The literature review chapter identifies the most relevant strategies for sustainable communities Strategies and objectives are divided into social environmental and economic approaches and then detailed in a matrix The objectives in the matrix of sustainable measures are used as criteria to compare the four communities studied
