Education 2020 History:

A Brief History of Educational Developments in India Sankaranarayanan Paleeri, 2024-01-05 Ancient India served her people with incredible methods of education. However, these sumptuous streams of education later fell into a period of ignorance and disrepair. The country's education system lost its credibility and was seen as inferior to the European systems. This book describes the magnificence of the history of education in India during the Vedic, Jain, Buddha, and Islamic periods and during colonial British rule and the post-Independence era. *A History of Bilingual Education in the US* Sarah C.K. Moore, 2021-03-24 This book traces a history of bilingual education in the US, unveiling the pervasive role of politics and its influence on integrity of policy implementation. It introduces readers to once nationwide systemic supports for diverse bilingual educational programs and situates particular instances and phases of its expansion and decline within related sociopolitical backdrops. The book includes overlooked details about key leaders and developments that affected programs under the Bilingual Education Act. It delves deeply into a past infrastructure, what it entailed, how it worked, and who was involved. This volume is essential reading for researchers, students, administrators, education leaders, bilingual advocates, and related stakeholders invested in understanding the history of language education in the US for future planning, expansion, and enhancement of bilingual educational programs and promotion of equity and access in schooling. Why History Education? Nadine Fink, Markus Furrer, Peter Gautschi, 2023-08-22 Sinn und Zweck der Geschichte werden immer wieder neu hinterfragt, weil sich Gesellschaften ständig neu verorten. Davon ist der Geschichtsunterricht direkt betroffen. Warum Geschichtsunterricht? Autorinnen aus 18 Ländern und vier Kontinenten fragen daher nach der Bedeutung des Geschichtsunterrichts aus unterschiedlichen Perspektiven mit theoretischen Überlegungen und Modellen mit Bezug aus der Unterrichtspraxis und Erkenntnissen aus der Forschung. Die Publikation präsentiert eine ganze Reihe von Gründen, warum Geschichte heute unbedingt unterrichtet werden muss. Sie liest sich als Plädoyer für einen kompetenten Umgang mit Geschichte in heutigen Gesellschaften. *Knowing History in Schools* Arthur Chapman, 2021-01-07 The knowledge turn in curriculum studies has drawn attention to the central role that knowledge of the disciplines plays in education and to the need for new thinking about how we understand knowledge and knowledge building. *Knowing History in Schools* explores these issues in the context of teaching and learning history through a dialogue between the eminent sociologist of curriculum Michael Young and leading figures in history education research and practice from a range of traditions and contexts. With a focus on Young's powerful knowledge theorisation of the curriculum and on his more recent articulations of the powers of knowledge, this dialogue explores the many complexities posed for history education by the challenge of building children's historical knowledge and understanding. The book builds towards a clarification of how we can best conceptualise knowledge building in history education. Crucially, it aims to help history education students, history teachers, teacher educators, and history curriculum designers navigate the challenges that knowledge building processes pose for learning history in schools.

Routledge Handbook of Contemporary South Korea Sojin Lim, Niki J.P. Alsford, 2021-08-31 The Routledge Handbook of Contemporary South Korea offers a ground breaking study of the socio political development of the Korean peninsula in the contemporary period. Written by an international team of scholars and experts, contributions to this book address key intellectual questions in the development of Korean studies, projecting new ways of thinking about how international systems can be organised and how local societies adapt to global challenges. Academically rigorous, each chapter defines current research and lends the reader greater understanding of the social, cultural, economic and political developments of South Korea, ranging from chapters on the Korean Wave to relations with North Korea and the Korean language overseas. The volume is divided into eight sections, each representing a focused area of inquiry: socio political history, contemporary politics, political economy and development, society, culture, international relations, security and diplomacy, South Korea in international education. This handbook provides an interdisciplinary and comprehensive account of contemporary South Korea. It will be of great interest to students and scholars of Korean history, politics and international relations, culture and society, and will also appeal to policy makers interested in the Indo Asia Pacific region. Feelings and Work in Modern

History Agnes Arnold-Forster, Alison Moulds, 2022-01-27 Work in all its guises is a fundamental part of the human experience, and yet it is a setting where emotions rarely take centre stage. This edited collection interrogates the troubled relationship between emotion and work to shed light on the feelings and meanings of both paid and unpaid labour from the late 19th to the 21st century. Central to this book is a reappraisal of emotional labour, now associated with the household and life admin work largely undertaken by women, and which reflects and perpetuates gender inequalities. Critiquing this term and the history of how work has made us feel, *Feelings and Work in Modern History* explores the changing values we have ascribed to our labour, examines the methods deployed by workplaces to manage or administrate our emotions, and traces feelings through 19th, 20th and 21st century Europe, Asia and South America. Exploring the damages wrought to physical and emotional health by certain workplaces and practices, critiquing the pathologisation of some emotional responses to work, and acknowledging the joy and meaning people derive from their labour, this book appraises the notion of work life balance, explores the changing notions of professionalism, and critically engages with the history of capitalism and neo liberalism. In doing so, it interrogates the lasting impact of some of these histories on the current and future emotional landscape of labour.

Like Nobody's Business Andrew C. Comrie, 2021-02-23 How do university finances really work? From flagship public research universities to small private liberal arts colleges, there are few aspects of these institutions associated with more confusion, myths or lack of understanding than how they fund themselves and function in the business of higher education. Using simple, approachable explanations supported by clear illustrations, this book takes the reader on an engaging and enlightening tour of how the money flows. How does the university really pay for itself? Why do tuition and fees rise so fast? Why do universities lose money on research? Do most donations go to athletics? Grounded in hard data, original analyses and

the practical experience of a seasoned administrator this book provides refreshingly clear answers and comprehensive insights for anyone on or off campus who is interested in the business of the university how it earns its money how it spends it and how it all works
