Economy And Society An Outline Of Interpretive Sociology 2 Volume Set:

Bridging Educational Leadership, Curriculum Theory and Didaktik Michael Uljens, Rose M. Ylimaki, 2017-10-04 This book is open access under a CC BY 4.0 license This volume argues for the need of a common ground that bridges leadership studies curriculum theory and Didaktik It proposes a non affirmative education theory and its core concepts along with discursive institutionalism as an analytical tool to bridge these fields It concludes with implications of its coherent theoretical framing for future empirical research Recent neoliberal policies and transnational governance practices point toward new tensions in nation state education These challenges affect governance leadership and curriculum involving changes in aims and values that demand coherence Yet the traditionally disparate fields of educational leadership curriculum theory and Didaktik have developed separately both in terms of approaches to theory and theorizing in USA Europe and Asia and in the ways in which these theoretical traditions have informed empirical studies over time An additional aspect is that modern education theory was developed in relation to nation state education which in the meantime has become more complicated due to issues of globalism This volume examines the current state of affairs and addresses the issues involved In doing so it opens up a space for a renewed and thoughtful dialogue to rethink and re theorize these traditions with non affirmative education theory moving beyond social reproduction and social transformation perspectives

Varieties of Multiple Modernities, 2015-11-24 To date the nascent consequential notion of multiple modernities has been predominately grounded in historical research with the purpose of validating the theory Yet the notion of multiple modernities represents a radical transformation in the way modernity and indeed the contemporary world is viewed As such the central aim of this volume is to explore the implications and hidden understanding of the multiple modernities research project beyond historical analysis in order to investigate its wide ranging omnipresent implications as they exist in communication and in the social order of societal membership in contemporary societies This volume collects new research about multiple modernities and globalization It shows the new turn of sociological theory in the contemporary scene with respect to multiple modernities multi centrism transglobality hybridization and multiculturalism and explores it as a new area of societal communication one that takes effect in the sectors of a global society as a society of societies The studies in this book converge to demonstrate that the route of Western modernization its cultural program and its institutional structure does not follow the pathway of modernization that we have thus far observed in the emerged new area Rather the continuation of the multiple modernities research program is given a new design researching the social structure and dynamic of postmodern societies their exchange and the debate about the flow of free resources But the studies are also evidence that the sociological theory has no normative foundation Contributors are Mehdi P Amineh Barrie Axford Eliezer Ben Rafael Shmuel N Eisenstadt Mark Jarzombek Werner Krawietz Judit Bokser Liwerant Manussos Marangudakis Jan Nederveen Pieterse Gerhard Preyer Roland Robertson Luis Roniger Yitzhak Sternberg and Michael Sussman

Science Meets Philosophy Hans Christian Garman

Johnsen,2023-04-26 The book is an attempt to bring together what are often seen as incommensurable scientific and philosophical positions Its core argument is that a main reason for the divisions about what constitutes scientific knowledge relates to disagreements on philosophical issues The book explores what these disagreements are about and discusses whether they can be overcome Taking a historical perspective the book traces the divides in science back to three main philosophical traditions realism idealism and scepticism It maps how these have inspired three main current positions in science logical empiricism phenomenology and sociology of scientific knowledge The book is intended for a general audience concerned with today's debates on scientific knowledge and society It will be useful for students and researchers studying philosophy of science sociology of scientific knowledge realism phenomenology positivism logical empiricism analytical philosophy and sustainable scientific knowledge *Radicalism and the Revolt Against Reason (Routledge Revivals)* Irving Louis Horowitz,2009-09-10 Radicalism and the Revolt Against Reason is a work that continues to have a steady and large scale impact on political and social theory fifty years since its first appearance A study of how radical thought modifies its actions and ideologies in a time of unrealized and frustrated expectations the focus is on Georges Sorel and the Europe of the fin de siècle a time when socialist revolution was forcefully set aside by liberal reform In a technique that presaged contemporary period radical demands did not simply dissolve or disappear they profoundly changed emphasis from the impersonal forces of history to highly personal forces of individual will This edition includes a substantial brand new introduction by the author *Directions* ,1979 *Political Corruption* Robert Alan Sparling,2019-04-02 The notion of corruption as a problem for politics spans many centuries and political social and cultural contexts But it is incredibly difficult to define what we mean when we describe a regime or actor as corrupt while corruption suggests a falling away from purity health or integrity it flourishes today in an environment that is often inarticulate about its moral ideals and wary of perfectionist discourse Providing a historical perspective on the idea Robert Alan Sparling explores diverse visions of corruption that have been elucidated by thinkers across the modern philosophical tradition In a series of chronologically ordered philosophical portraits Political Corruption considers the different ways in which a metaphor of impurity disease and dissolution was deployed by political philosophers from the Renaissance to the early twentieth century Focusing specifically on the thought of Erasmus tienne de La Bo tie Machiavelli Montesquieu Bolingbroke Robespierre Kant and Weber Sparling situates these thinkers in their historical contexts and argues that each of them offers a distinctive vision of corruption that has continuing relevance in contemporary political debates He contrasts immoderate purists with impure moderates and reveals corruption to be a language of reaction and revolution The book explores themes such as the nature of civic trust and distrust the relationship of transparency to accountability the integrity of leaders and the character of uncorrupted citizens the division between public and private the nature of dependency and the relationship between regime and civic disposition Political Corruption examines how philosophers have conceived of public office and its abuse and how they have sought to

insulate the public sphere from anticivic inclinations and interests Sparling argues that speaking coherently about political corruption in our present moment requires a robust account of the good regime and of the character of its citizens and officeholders

The Paradox of Local Empowerment Andrew Dan Selee, 2006 This dissertation examines whether decentralization to municipal governments in Mexico has improved democratic governance The research examines the effects of decentralization on democratic governance in three Mexican cities Tijuana Ciudad Nezahualc yotl and Chilpancingo and draws on key national indicators The findings indicate that decentralization has significantly increased the authority and autonomy of Mexican municipalities but that these changes have not necessarily led to local governments that are responsive and accountable to citizens or allow for citizens active engagement in public affairs Further analysis of these findings suggests that municipal political institutions create few incentives for public authorities to be responsive and accountable to citizens The use of closed party lists prohibitions on independent candidacies guaranteed supermajorities for the leading party and the prohibition on reelection all combine to undermine accountability and responsiveness In this environment public authorities tend to be more concerned about party leaders than citizens As a result citizens continue to be linked to local governments through political brokers within the principal political parties and there are few real opportunities for citizen engagement outside of these mediated channels despite the nominal existence of elaborate participatory planning processes Nonetheless the study also finds marked differences in the way that citizens are linked to the political system in different cities Where strong social organizations existed prior to decentralization citizens are more likely to have effective albeit indirect channels for voice in public affairs Where these social organizations are linked closely to the principal political parties they are even more likely to influence public policy than where these organizations are highly autonomous Strong social organizations provide a necessary basis for ensuring citizen voice but their li
