## How to Write a Research Essay for History

### STEP 1: Focusing your topic:

- Choose a topic you are interested in and that you want to learn more about.
- Formulate a working thesis idea to use as a starting point to find source information.
- After doing some preliminary research, create a more specific working thesis statement that expresses the main point you want to make about the topic.
- For history essays, you should *reach some conclusions about the topic* based on your research. *The conclusions are what your thesis statement should convey.*

**STEP 2: Research:** Librarians can help you find appropriate sources. Some types of sources are NOT appropriate to use for a college level essay, including encyclopedias (including Wikipedia), and textbooks, etc. (These are places to start if you have no information about the topic, but they are not always reliable sources of research info).

- Use sources that contain information that supports the thesis statement of your essay.
- *Don't* use sources that you do not understand.
- **Evaluate** any source (especially Internet sources) you plan to use to be sure it is accurate, objective, current, balanced and unbiased, and legitimately authored (i.e. Who claims responsibility for the information?)

Record documentation information at the time you find sources, so you don't have to relocate the sources when you are doing your Works Cited page. See the Writing Center handout on MLA documentation for specific citation information you'll need for each source.

***Do not procrastinate about doing your research!*** The research essay is a time consuming project. You must do the research before you can write the essay, and the writing will take some time. If you are not familiar with research writing and documenting research writing, it will take you even longer to complete the essay. Give yourself enough time to do everything that is required of you before the essay is due.

### STEP 3: Preparing to write the essay:

- Taking notes while doing your research should help you create an outline of your essay.
- Create an outline of the information you want to include in your essay. (Decide if you want to present the information chronologically or topically.)
- Assemble your sources and the assignment handout before you start writing the first draft.

**Footnotes or Endnotes?** Footnotes and endnotes are used to provide extra information to the reader that you don't want to include in the text of your paper. They are not the same as in-text citations, which give documentation information about sources, although sometimes footnotes/endnotes will include specific publication information about sources. Footnotes are positioned at the bottom of each page of the text, with a corresponding superscript number in the text to direct the reader to the correct footnote. Endnotes are listed on a separate page at the end of the text, just before the Works Cited page. *The Modern Language Association (MLA) prefers endnotes over footnotes.* However, if your instructor asks you to use footnotes, use footnotes.
