out? Statistical evaluation of student cheating Anatoly Peresetsky, Ekaterina Borisova, 2022-01-29 We suggest an original method of student cheating evaluation based on the comparison of students grades in exams in class home assignments and experimental homework The data for the study is collected from the survey of 2012 2013 sophomores of the International College of Economics and Finance at the National Research University Higher School of Economics in Moscow Russia At the end of the course in Statistics in addition to standard assignments homework and exams students were given experimental homework with a ban on cooperation among them The violation of this rule was qualified as cheating The scale of cooperation is measured and then tested through the stochastic frontier technique it reveals connection with the GPA level students expectations of the cheaters share and students moral norms We also find different behavioral patterns for high and low performing students as well as country specific context of student cheating behavior *The Effect of an Online Academic Integrity Tutorial on Student Perceptions of Cheating* Robin Eugenia Grebing, 2015 Many college faculty members expect more cheating to occur in online classes than in face to face courses This opinion stems from the belief that it is easier for students to cheat when material is delivered online and the instructor is not physically present to deter cheating To many it seems reasonable that online courses provide students with greater opportunities to cheat In one study the researchers found 64% of faculty and 57% of students thought cheating in online classes would be easier than in face to face courses Kennedy Nowack Raghuraman Thomas Lanier 2006 On the other hand delivery type is less of a predictor of cheating behavior than other factors Part of term major and classification were significant predictors of student cheating behaviors Mastin Peska McCabe 2005 enda Duran McCabe McCabe Trevi o 1996 There has been very little research on the effect of online tools such as plagiarism tutorials and academic integrity tutorials on changing student cheating behaviors and perceptions The purpose of this quantitative study was to determine the effect of an online academic integrity tutorial on students perceptions of cheating at a large sized community college in an urban area in the Midwest Students enrolled in at least one online class participated in a survey measuring their attitudes about cheating before and after completing an online academic integrity tutorial The tests used to analyze the data to address question one included a dependent means t test an ANOVA and an independent means t test A Box Whisker Plot was created for question two and a Scatter Plot was created for question three to visually inspect the data and determine if a Pearson Correlation should be conducted Neither graphs revealed a correlation The analysis revealed that an online academic integrity tutorial had no significant effect on student perceptions of cheating However further analysis on the 29 types of cheating behaviors showed significance for five of the items The sample size was too small to successfully analyze the effect of major and age on the change in student perceptions of cheating The variable gender showed no effect but there was a significant effect between classification groups Freshmen were likely to experience a change in their perception compared to other classifications A student s knowledge of the institution s academic integrity policies did not correlate to perceptions of cheating Similarly there was no correlation

between student perceptions of cheating and actual incidents of self reported cheating Nevertheless there was a positive gain in the mean scores from pre to post survey and additional research of the effect of an online academic tutorial is needed

Among High School Students Anthony J. Galvan, 2014 Academic dishonesty is still a challenge for many school districts Students have been more creative and inventive in finding ways to evade being caught by educators Many students spend more time planning ways to cheat to enhance their outcomes than they actually spend studying and preparing for the test There is a spectrum of cheating and some students think it is acceptable if the teacher allows it and doesn t monitor the classroom well enough to discourage cheating Along the spectrum other students feel it is acceptable to work together share answers or use outside resources if they feel the teacher is being too hard or giving too much work Technology has made it more difficult to monitor academic dishonesty and many websites even encourage cheating by giving in depth details for cheating and not getting caught It is a challenge for school administrators to enforce student handbook guidelines regarding academic cheating if the rules and expectations are not clearly defined *Cheating. Research Brief* Howard Johnston, 2007 According to the Josephson Institute s 2006 Report Card on the Ethics of American Youth today s young people reveal deeply entrenched habits of dishonesty The report released as part of National CHARACTER COUNTS Week October 15 21 reveals high rates of cheating lying and theft Cheating in school continues to be rampant A substantial majority 60% cheated on a test during the past year 35% did so two or more times and one in three 33% said they used the Internet to plagiarize an assignment As grim as these statistics appear to be they are actually an improvement over earlier studies According to Josephson Institute research in the decade from 1992 to 2002 the number of high school students who admitted that they cheated on an exam increased significantly from 61% to 74% In 2000 71% admitted to cheating Three studies commissioned by Educational Testing Service articulate the motivations reasons and beliefs of students who cheat on academic tasks There are hundreds of specific practices that can be used to detect and punish cheating including websites where teachers can upload student papers to check for pirated text However most educators agree that the best way to deal with cheating is to prevent it if at all possible Some of these preventive practices include 1 Give original and unique assignments that cannot be plagiarized or snagged off of a website 2 Discuss academic ethics early and often and make clear what the penalties for cheating will be 3 Reinforce quality performance by showcasing student work and conducting conferences with students about their assignments so that teachers can ascertain how familiar a student is with the concepts presented in the

assignment 4 Require that students show all work including initial references notes drafts and subsequent revisions and 5 Use essays that test students thinking and communication as well as their mastery of information Contains 11 online resources
