Free and Easy Website Design for Museums and Historic Sites Kelsey J. S. Ransick, 2015-12-16 Museums and historic sites faced with small budgets and staff can find it intimidating to redesign or create a website from scratch Concerns over resources make coding and designing or hiring someone to do so daunting and expensive It does not have to be so Content creation is inescapable when making a website but designing and constructing a unique website can be as simple as taking an afternoon to use a color chart to pick a color scheme and paste in text from a Word document All of the tools discussed in the book are free at the base level and some offer upgrade packages with even more features The advice and techniques are all created with an eye to making websites work for smaller institutions with limited budgets and timeframes Every museum professional has come across issues when adapting general software for an institution's specific needs and the information in this book will anticipate some of these needs by offering easy-to-implement workarounds and information on related software or services that integrate with each website Features include How-to guides for Wix Weebly WordPress and Google Sites Detailed comparisons of WYSIWYG What You See Is What You Get editors by cost features and ease of use so that you can easily identify which platforms meet your needs Mythbusting of common website and computer assumptions Step-by-step content and design planning guide Basic HTML coding tricks and tips for the slightly more advanced users or those who want to become so A free companion Web site includes links to online resources ongoing updates to this book to keep it current and links to other free online tools and software Go to <https://freethemuseum.wixsite.com/aaslh> to request access on this author created and managed companion site

Always On : Language in an Online and Mobile World Naomi S. Baron Professor of Linguistics American University, 2008-04-04 In *Always On* Naomi S Baron reveals that online and mobile technologies including instant messaging cell phones multitasking Facebook blogs and wikis are profoundly influencing how we read and write speak and listen but not in the ways we might suppose Baron draws on a decade of research to provide an eye opening look at language in an online and mobile world She reveals for instance that email IM and text messaging have had surprisingly little impact on student writing Electronic media has magnified the laid back whatever attitude toward formal writing that young people everywhere have embraced but it is not a cause of it A more troubling trend according to Baron is the myriad ways in which we block incoming IMs camouflage ourselves on Facebook and use ring tones or caller ID to screen incoming calls on our mobile phones Our ability to decide who to talk to she argues is likely to be among the most lasting influences that information technology has upon the ways we communicate with one another Moreover as more and more people are always on one technology or another whether communicating working or just surfing the web or playing games we have to ask what kind of people do we become as individuals and as family members or friends if the relationships we form must increasingly compete for our attention with digital media Our 300 year old written culture is on the verge of redefinition Baron notes It's up to us to determine how and when we use language technologies and to weigh the personal
