Education And Leadership At The Interface Probing The Boundaries:

Leadership Joan Marques, 2016-07-15 Leadership argues that finding satisfaction and sanity at work requires the development of both ambition and acceptance. While these traits seem to be at odds with one another, Marques shows that each one has positive and negative elements and the trick is balancing the useful aspects of each to maximize success. The book defines this balance and its relationship to success, featuring real world examples, useful diagrams, and cases to encourage students to reflect on how to apply these principles to their own lives. Laying the foundation for understanding the need to develop both ambition and acceptance and providing the context for what performance means in modern times, Marques presents a framework for growing in one's own career. Students learn how to evaluate competing impulses and how to make critical decisions to define career success. Students of career development, leadership, and organizational behavior classes will appreciate its grounded, engaging writing style.

Ethical Leadership Joan Marques, 2017-09-27 This book introduces readers to the moral dilemmas associated with business decisions, helping students to understand the moral and ethical considerations leaders face in the workplace and providing a framework for balancing business demands with doing the right thing. The author walks readers through the basics of Western moral philosophy before the 20th century and beyond, covering Utilitarianism, Universalism, the Golden Rule, and Virtue Ethics, as well as compelling Eastern moral philosophy to help readers link individual behavior to the larger scheme of corporate social responsibility. The text combines this with a survey of various leadership theories such as servant leadership, awakened leadership, authentic leadership, and spiritual leadership to present a model that combines the strengths of each theory. Students will become familiar with the mindsets behind moral pitfalls along with their potentially disastrous effects and how these can be overcome. Chapter summaries and relevant cases, including studies on Fidel Castro, Wells Fargo, Mylan's EpiPen, Price Gouging, and more, will help students to place theories in context, learning how to achieve success in business ventures successfully, compassionately, and ethically. With an easy-to-grasp three-part progression and reflective questions for both chapters and cases, Ethical Leadership will benefit students of leadership and business ethics.

Education and Leadership Tom Claes, Frank McMahon, David Seth Preston, 2008 This truly international book brings together authors from different regions of the world, including North America, South Africa, Europe, Iran, and Russia, all of whom are concerned with aspects of the challenges involved in the expansion of higher education, both in student numbers and areas of study. Some are concerned about the loss of guiding principles which steered university education for centuries. The traditional purposes of higher education have come under such pressure that we have achieved conflicting models of the university. Claes and ambiguity in regard to teaching and research. Simons et al. For others, the problems are at a different stage. Contributions from South Africa look at three challenges: Can we provide enough places in higher education? How do we

deal with institutional mergers How do we make staff development effective in a situation in which English is the first language of less than five percent of the staff Young scholars in Russian regions face formidable hurdles in achieving academic careers while the best law graduates in Canada are faced with the ethical dilemma of personal career advancement or social justice Topsakal The problem of integrating nursing into a traditional Irish university is reviewed by Grant while the role of a university in regional development is addressed from a Greek perspective by Papaelias et al The comparative international approach features in research into teacher job satisfaction in India and Iran while McMahon reviews the impact of the Bologna Process International Aerospace Abstracts ,1996 **Dissertation Abstracts International** ,1989
