Keith S. Taber

Education And Psychology Plato Piaget And Scientific Psychology:

Education and Psychology Kieran Egan, 2014-02-14 Psychology of education has long held a place in the curriculum for training teachers but what implications can psychological theory legitimately have for educational practice In this book the author makes a direct attack on the current role of psychology in education showing important differences between psychologist's and educator's interests in topics such as learning motivation and development and questioning the validity of many of Piaget's most fundamental ideas He compares two developmental theories that superficially have much in common: Plato's and Piaget's and focuses on their implications for learning in the classroom He shows why Plato's theory whether or not we agree with it serves as a model of a useful educational theory and why Piaget's theory has no implications for education He reaches the conclusion that psychological theories and research based on them are irrelevant to educational practice

Education and Psychology Kieran Egan, Sociocultural Theory and the Pedagogical Imperative in L2 Education James P. Lantolf, Matthew E. Poehner, 2014-03-05 Explicating clearly and concisely the full implication of a praxis oriented language pedagogy this book argues for an approach to language teaching grounded in a significant scientific theory of human learning a stance that rejects the consumer approach to theory and the dichotomy between theory and practice that dominates SLA and language teaching This approach is based on Vygotsky's sociocultural theory according to which the two activities are inherently connected so that each is necessarily rooted in the other practice is the research laboratory where the theory is tested From the perspective of language education this is what is meant by the pedagogical imperative Sociocultural Theory and the Pedagogical Imperative in L2 Education Elaborates a new approach to dealing with the relationship between theory and practice an approach grounded in praxis the dialectical unity of theory and practice Presents an analysis of empirical research illustrating praxis based principles in real language classrooms Brings together cognitive linguistics and sociocultural theory the former provides the theoretical knowledge of language required of praxis and the latter furnishes the theoretical principles of learning and development also called for in a praxis approach Offers recommendations for redesigning teacher education programs Its timely focus on the theory practice gap in language education and its original approach to bridging it put this book at the cutting edge of thinking about Vygotskian sociocultural theory in applied linguistics and SLA

Curriculum Studies: Curriculum knowledge David Scott, 2003 **Indian Writings on Education, 1979-1986** S. P. Agrawal, J. C. Aggarwal, 1992 Progressing Science Education Keith S.

Taber, 2009-05-29 Exploring one of the central themes in science education theory this volume examines how science education can be considered as a scientific activity within a broad post positivist notion of science Many students find learning science extremely problematic whatever level of education they have reached At the end of the 1970s a new approach to tackling learning difficulties in science was developed drawing on ideas from psychology and cognitive science and centred on the way students build up new knowledge in reference to their existing ideas Constructivism became the

dominant paradigm in science education research for two decades spawning a vast body of literature reporting aspects of learners ideas in different science topics However Constructivism came under fire as it was recognised that the research did not offer immediate and simple prescriptions for effective science teaching The whole approach was widely criticised in particular by those who saw it as having anti science leanings In this book the notion of scientific research programmes is used to understand the development limitations and potential of constructivism It is shown that constructivist work in science education fits into a coherent programme exploring the contingencies of learning science The author goes further to address criticisms of constructivism evaluate progress in the field and suggest directions for future research It is concluded that constructivism has provided the foundations for a progressive research programme that continues to guide enquiry into learning and teaching science Addressing Issues of Access and Fairness in Education through Dynamic Assessment

Matthew E Poehner, Pauline Rea-Dickins, 2014-03-05 Increased emphasis in many school systems on formal testing to mark student achievement and hold teachers accountable has begun to heighten concern among many educational policy makers assessment specialists and classroom teachers over questions of access and fairness particularly for learners from culturally different backgrounds and those with a history of academic struggles This situation echoes that faced by the Russian psychologist L S Vygotsky nearly ninety years ago in his efforts to understand processes of development and meet the needs of all learners His famous proposal of the Zone of Proximal Development ZPD holds that assessments must take account not only of abilities that have fully formed but also those that are still emerging The diagnostic value of the ZPD lies in identifying the underlying source of learner difficulties as well as their future potential Since Vygotsky s time psychologists and educators have devised a range of practices for engaging with learners in ZPD activity that have come to be known as Dynamic Assessment DA In DA assessors go beyond observations of independent performance and engage cooperatively with learners to both understand and support their development This process is in full evidence in the papers in this collection which offers a cross section of applications of DA with diverse populations including special needs learners immigrant and minority students and second language learners While these papers may be read as cutting edge academic research they also represent a commitment to going beyond manifest difficulties and failures to help individuals construct a more positive future This book was originally published as a special issue of Assessment in Education Principles Policy Practice **Maria**

Montessori Marion O'Donnell, 2012-12-27 An insightful guide to this philosophy of education covering its origins features and practices **Handbook of Research in Second Language Teaching and Learning** Eli Hinkel, 2011-01-25 This

landmark volume provides a broad based comprehensive state of the art overview of current knowledge and research into second language teaching and learning All authors are leading authorities in their areas of expertise The chapters all completely new for Volume 2 are organized in eight thematic sections Social Contexts in Research on Second Language Teaching and Learning Second Language Research Methods Second Language Research and Applied Linguistics Research in

Second Language Processes and Development Methods and Instruction in Second Language Teaching Second Language Assessment Ideology Identity Culture and Critical Pedagogy in Second Language Teaching and Learning Language Planning and Policy Changes in Volume 2 captures new and ongoing developments research and trends in the field surveys prominent areas of research that were not covered in Volume 1 includes new authors from Asia Australia Europe and North America to broaden the Handbook's international scope Volume 2 is an essential resource for researchers faculty teachers and students in MA TESL and applied linguistics programs as well as curriculum and material developers

The Education Quarterly India. Ministry of Education, 1986

Plato's Epistemology Elizabeth A. Laidlaw-Johnson, 1996 Plato's thought evolves from the epistemology of the Meno Phaedo and Republic to the Combined Doctrine of the Theaetetus The Combined Doctrine maintains that both Forms and certain objects rooted in perception are objects of knowledge Dialectic results in apprehension of the Good and consequently of being which brings about a permanent change in a person's state of mind enabling one to know what one previously believed The Combined Doctrine resolves the paradoxes of the refutations of the Theaetetus It turns out that the difference between true belief and knowledge for Plato amounts to difference in states of mind

The Journal of Educational Thought, 1984

Curriculum Models and Early Childhood Education Stacie G. Goffin, 1994 This thoroughly up to date and completely accessible book uses a socio historical perspective to examine the major curriculum models of early childhood education It examines the approaches of Montessori Developmental Interaction Direct Instruction Kamii DeVries High Scope and Reggio Emilia curriculum Comprehensive coverage looks at each model in terms of purpose and function impact on early childhood education theoretical underpinnings and current evaluations For parents and teachers interested in early childhood education and curriculum

The Adolescent as Decision-Maker Judith Worell, Fred Danner, 1989-10-28 This book reviews current theories and research on adolescent development and their implications for education It is organized around the theme of the adolescent as decision maker and covers areas of normal development that are crucial for the transition to independence The issues raised by the thoughtful reviews will stimulate discussion and debate and will provide new perspectives on adolescence
