*Early Analytic Philosophy - New Perspectives on the Tradition* Sorin Costreie, 2016-01-21 This volume discusses some crucial ideas of the founders of the analytic philosophy Gottlob Frege Bertrand Russell and Ludwig Wittgenstein or the golden trio The book shows how these old ideas are still present and influential in the current philosophical debates and to what extent these debates echo the original ideas The collection aim is twofold to better understand these fruitful ideas by placing them in the original setting and to systematically examine these ideas in the context of the current debates animating philosophical discussions today Divided into five sections the book first sets the stage and offers a general introduction to the background influences as well as delimitations of the initial foundational positions This first section contains two papers dedicated to the discussion of realism and the status of science at that time followed by two papers that tackle the epistemic status of logical laws The next three sections constitute the core of the volume each being dedicated to the most important figures in the early analytic tradition Frege Russell and Wittgenstein The last section gathers several essays that discuss either the relation between two or more analytic thinkers or various important concepts such as predicativism and arbitrary function or the principles of abstraction and non contradiction

**Neo-Aristotelian Perspectives in Metaphysics** Daniel D. Novotný, Lukáš Novák, 2014-04-16 This volume re examines some of the major themes at the intersection of traditional and contemporary metaphysics The book uses as a point of departure Francisco Suarez's *Metaphysical Disputations* published in 1597 Minimalist metaphysics in empiricist pragmatist clothing have today become mainstream in analytic philosophy Independently of this development the progress of scholarship in ancient and medieval philosophy makes clear that traditional forms of metaphysics have affinities with some of the streams in contemporary analytic metaphysics The book brings together leading contemporary metaphysicians to investigate the viability of a neo Aristotelian metaphysics

present and future research in information technology      Conceptual Realism and Historicity: Brandom versus Hegel Norman Schultz, 2024-12-23 A persistent challenge in philosophy is constructing an explicit link between mind and external reality In this regard this book introduces and examines two opposing philosophies It scrutinizes Brandom's inferentialist solution encompassing his influential work *Making It Explicit* 1994 and his controversial interpretation of Hegel as a conceptual realist in *A Spirit of Trust* 2019 Contrastingly it introduces Hegel's relativist historicism arguing that a robust epistemological framework does not necessitate an explicit link to mind independent reality By confining knowledge to its historical context it prevents adherence to false beliefs maintaining openness for truth to emerge one day      **Wittgenstein and Pragmatism** Anna Boncompagni, 2016-12-20 This book investigates the conflicts concerning pragmatism in Wittgenstein's work *On Certainty* through a comparison with the pragmatist tradition as expressed by its founding fathers Charles S Peirce and William James It also describes Wittgenstein's first encounters with pragmatism in the 1930s and shows the relevance of Frank Ramsey in the development of his thought Offering a balanced critical and theoretical examination the author discusses issues such as doubt certainty common sense forms of life action and the pragmatic maxim While highlighting the objective convergences and divergences between the two approaches the volume makes links to ongoing debates on relativism foundationalism scepticism and objectivity It will be of interest to anyone searching for new perspectives on Wittgenstein's philosophy      **From Dummett's Philosophical Perspective** Anat Matar, 2013-02-06 No detailed description available for *From Dummett's Philosophical Perspective*      **Knowledge, Mind and Reality: An Introduction by Early Twentieth-Century American Women Philosophers** Joel Katzav, Krist Vaesen, Dorothy Rogers, 2023-03-22 This book is the first volume featuring the work of American women philosophers in the first half of the twentieth century It provides selected papers authored by Mary Whiton Calkins Grace Andrus de Laguna Grace Neal Dolson Marjorie Glicksman Grene Marjorie Silliman Harris Thelma Zemo Lavine Marie Collins Swabey Ellen Bliss Talbot Dorothy Walsh and Margaret Floy Washburn The book also provides the historical and philosophical background to their work The papers focus on the nature of philosophy knowledge the philosophy of science the mind matter nexus the nature of time and the question of freedom and the individual The material is suitable for scholars researchers and advanced philosophy students interested in history of philosophy theories of knowledge philosophy of science mind and reality      **Philosophy Newsletter**, 2015      *The Oxford Handbook of Truth* Michael Glanzberg, 2018-06-26 Truth is one of the central concepts in philosophy and has been a perennial subject of study Michael Glanzberg has brought together 36 leading experts from around the world to produce the definitive guide to philosophical issues to do with truth They consider how the concept of truth has been understood from antiquity to the present day surveying major debates about truth during the emergence of analytic philosophy They offer critical assessments of the standard theories of truth including the coherence correspondence identity and pragmatist theories They explore the role of truth in metaphysics with lively discussion of truthmakers

proposition determinacy objectivity deflationism fictionalism relativism and pluralism Finally the handbook explores broader applications of truth in philosophy including ethics science and mathematics and reviews formal work on truth and its application to semantic paradox This Oxford Handbook will be an invaluable resource across all areas of philosophy

**Objectivity and Insight** Mark Sacks, 2000-11-09 Mark Sacks presents an innovative study of the nature and scope of objectivity He argues for a conception of objectivity that draws on the central insight of transcendental idealism while preserving a non metaphysical orientation The first two parts of *Objectivity and Insight* explore the prospects for objectivity on the standard ontological conception and find that they are not good In Part I under the heading of subject driven scepticism Sacks addresses the problem of securing epistemic reach that extends beyond subjective content In so doing he considers models of mind proposed by Locke Hume Kant James and Bergson Part II under the heading of world driven scepticism discusses the scope for universality of normative structure a problem which survives even after the assumption of an epistemologically significant breach between subject and object has been rejected In the third part of the book Sacks introduces an alternative conception of objectivity and shows that there is good reason to accept it This conception turns on an insight which is taken to be implicit in transcendental idealism and responsible for its abiding appeal but Sacks's articulation of that insight is neither idealist nor metaphysical

*Logical Studies in Early Analytic Philosophy* Nino B. Cocchiarella, 1987 *International Philosophical Quarterly*, 1961 **The Historical Turn in Analytic Philosophy** E. Reck, 2013-03-27 During the last 25 years a large number of publications on the history of analytic philosophy have appeared significantly more than in the preceding period As most of these works are by analytically trained authors it is tempting to speak of a historical turn in analytic philosophy The present volume constitutes both a contribution to this body of work and a reflection on what is or might be achieved in it The twelve new essays by an international group of contributors range from case studies on individual philosophers Russell Carnap Quine and Ryle through discussions of broader themes in the history of analytic philosophy in logic and philosophy of language philosophy of mathematics epistemology philosophy of mind and psychology to related methodological reflections on the relationship between doing analytic philosophy and studying the history of philosophy on various forms of philosophical history and on their respective benefits *The Modern Schoolman*
