Early Childhood Environment Rating Scale (ECERS-R) Thelma Harms, Richard M. Clifford, Debby Cryer, 2004-12-02

Featuring a spiral binding the updated Early Childhood Environment Rating Scale ECERS R offers more practical assistance in the form of an Expanded Score Sheet which contains a worksheet and additional notes for clarification to improve accuracy in scoring. However the items and indicators remain the same as in the original ECERS R. Designed for preschool kindergarten and child care classrooms serving children 2 1/2 through 5 years of age this widely used program quality assessment instrument can be used by program directors for supervision and program improvement by teaching staff for self assessment by agency staff for monitoring and in teacher training programs. The established reliability and validity of the ECERS R make it particularly useful for research and program evaluation. Convenient Organization in seven subscales: Space and Furnishings, Personal Care Routines, Language Reasoning Activities, Interaction, Program Structure, Parents and Staff. Each of the 43 items is expressed as a 7 point scale with indicators for 1 inadequate, 3 minimal, 5 good and 7 excellent. Notes for clarification and sample questions are included to improve accuracy in scoring. An introductory section gives detailed information about the rationale for the ECERS R, the process of revision and the reliability and validity of the scale. Full instructions for administration and scoring as well as an Expanded Scoresheet and Profile that may be photocopied are included with the scale.

**Early Childhood Quality Rating Scale—Emergent Curriculum (ECQRS-EC)** Kathy Sylva, Iram Siraj, Brenda Taggart, Denise Kingston. Young children's learning depends on a wide range of experiences that support their holistic development. While many different curricular frameworks are used around the world, there is increasing agreement that the emerging academic skills of language and literacy, mathematics and science should be supported by a playful pedagogy in the early years. The Early Childhood Quality Rating Scale Emergent Curriculum ECQRS-EC is designed to measure quality in these key areas within preschool settings. In addition to three content area subscales, this evidence-based tool includes a subscale dedicated to diversity and inclusion to help educators support gender and cultural differences in children 3-6 years old who are developing at different rates. Because it recognizes the important role of the adult in providing children with high quality interactions, this new quality rating scale can be used for research, teacher self-evaluation and program improvement, audit and regulation. Research that has worldwide significance is rare, but the authors have strong credentials from decades of work on projects that have global relevance for early years research, policy and practice. From the Foreword by W. Steven Barnett and Ellen C. Frede, co-directors, National Institute for Early Education Research, Rutgers. This indispensable tool.
