Everyware The Dawning Age Of Ubiquitous Computing Adam Greenfield:

Everyware Adam Greenfield, 2010-03-10 Ubiquitous computing almost imperceptible but everywhere around us is rapidly becoming a reality How will it change us how can we shape its emergence Smart buildings smart furniture smart clothing even smart bathtubs networked street signs and self describing soda cans Gestural interfaces like those seen in Minority Report The RFID tags now embedded in everything from credit cards to the family pet All of these are facets of the ubiquitous computing author Adam Greenfield calls everyware In a series of brief thoughtful meditations Greenfield explains how everyware is already reshaping our lives transforming our understanding of the cities we live in the communities we belong to and the way we see ourselves What are people saying about the book Adam Greenfield is intense engaged intelligent and caring I pay attention to him I counsel you to do the same HOWARD RHEINGOLD AUTHOR SMART MOBS THE NEXT SOCIAL REVOLUTION A gracefully written fascinating and deeply wise book on one of the most powerful ideas of the digital age and the obstacles we must overcome before we can make ubiquitous computing a reality STEVE SILBERMAN EDITOR WIRED MAGAZINE Adam is a visionary he has true compassion and respect for ordinary users like me who are struggling to use and understand the new technology being thrust on us at overwhelming speed REBECCA MACKINNON BERKMAN CENTER FOR INTERNET AND SOCIETY HARVARD UNIVERSITY Everyware is an AIGA Design Press book published under Peachpit's New Riders imprint in partnership with AIGA

Everyware, 2006 Ubiquitous computing or what the designer information architect Adam Greenfield calls Everyware is an emerging trend just starting to gain attention as it also gains momentum The term refers to the integration of computers embedded in everyday objects with an ever present network moving computing off the desktop and into every aspect of our lives creating an environment where nearly every object is enabled with surprising new properties We already can see evidence of this technology and the tremendous convenience it affords us in such devices as the camera phone and PDA the EZPass that lets us pay tolls without stopping the ID chip that helps find lost pets the GPS system that offers driving directions and the iris scanner that confirms a person's identity These ingenious systems offer convenience innovative product opportunities and sometimes security but to function effectively Everyware comes at a cost of privacy and autonomy As consumers we owe it to ourselves to become aware of this trend so that we can have a voice in its development

Law in an Era of Smart Technology Susan Brenner, 2007-12-31 Should law be technologically neutral or should it evolve as human relationships with technology become more advanced In Law in an Era of Smart Technology Susan Brenner analyzes the complex and evolving interactions between law and technology and provides a thorough and detailed account of the law in technology at the beginning of the 21st century Brenner draws upon recent technological advances evaluating how developing technologies may alter how humans interact with each other and with their environment She analyzes the development of technology as shifting from one of use to one of interaction and argues that this interchange needs us to reconceptualize our approach to legal rules which were originally designed to prevent the misuse of older technologies As technologies continue to develop over the next several decades Brenner argues that the laws directed between human and technological relationships should remain neutral

She explains how older technologies rely on human implementation but new smart technology will be completely automated This will eventually lead to as she explains the ultimate progression in our relationship with technology the fusion of human physiology and technology Law in an Era of Smart Technology provides a detailed historically grounded explanation as to why our traditional relationship with technology is evolving and why a corresponding shift in the law is imminent and necessary
