## **Evidence Based Cardiology:**

*Evidence-Based Cardiology* Salim Yusuf, John A. Cairns, A. John Camm, Ernest L. Fallen, Bernard J. Gersh, 2008-04-15 This second edition is a ground breaking clinical text with a strong emphasis on rigorous evidence. Leaders in the field discuss best practice in the light of systematic reviews and randomised control trials and how best to treat where the information is less clear. Case histories provide intriguing discussions on how to apply the evidence in real life situations. Evidence based Cardiology also includes free access to the latest evidence which is automatically posted on a companion website.

**Evidence-Based Cardiology** Benjamin A. Steinberg, Christopher P. Cannon, 2015-09-15 Get quick portable access to the evidence you need to make effective clinical decisions. Evidence Based Cardiology succinctly summarizes all the clinical trials that affect the practice of cardiovascular medicine making it easy for you to implement the most appropriate diagnostic tests and treatments for your patients. Apply the latest knowledge on atrial fibrillation and heart failure including novel anticoagulants, new medical therapies, new devices including ablation and resynchronization and other advanced therapies. Select the best interventions for acute coronary syndrome with coverage of new antiplatelet strategies, management strategy updates and significant data on outcomes and guideline adherence. Navigate controversies across your entire field with in depth chapters exploring all areas of preventive cardiology, coronary revascularization and percutaneous procedures, unstable angina, non ST elevation myocardial infarction, ST elevation myocardial infarction, heart failure and arrhythmias. Look up all essential randomized clinical trials and understand their implications with concise summaries of trial design, study population, treatment regimen and results together with relevant ACC/AHA Practice Guidelines. *Evidence-Based Cardiology Consult* Kathleen Stergiopoulos, David L. Brown, 2013-11-01 The book will provide a detailed evidence based approach to key issues in the pathophysiology, diagnosis and management of patients with concurrent medical issues. It will provide a clinical focus with practical advice on the prevention, diagnosis and treatment of heart disease supported by an expert's summary without duplicating other texts. Each chapter will be structured similarly in the following sections: 1 Introduction, 2 Pathophysiology, 3 Diagnosis, 4 Management, 5 Key Points, 6 Summary of the key guidelines from professional societies where available. The recommendations will have a firm background in the AHA/ACC or ESC recommendations for the management of patients. The intention is to create a comprehensive book rather than a pocketbook or manual. We hope this book will serve as an up to date reference for the practicing clinician. Each of the approximately 40 chapters will have at most 5000 words and 5-7 high quality figures or illustrations each. Only the highest quality authors will be recruited from the United States and Europe. The emphasis will be on depth of information yet ease of access. This necessitates an approach whereby not a single word, sentence or page of the book will be wasted. Brief where it needs to be brief, detailed where detail is required, this will be a true all encompassing clinician reference. *Evidence-based Cardiology* Peter J. Sharis, Christopher P. Cannon, 2003 Thoroughly updated with the most current clinical trials and the latest American College of Cardiology and American Heart

Association guidelines this pocket sized handbook provides quick easy access to clinical trial data that support or refute clinical interventions Each chapter summarizes the pathophysiology of a disease and the guideline recommended diagnostic tests and treatments and presents synopses of the major clinical trials for all therapies This edition includes a new preventive cardiology section an index of trial acronyms highlights of selected pivotal trials and a new mini section covering clinical reference formulas This Second Edition is also available electronically for PDAs See Media Products section for details

**Evidence-Based Cardiology** Salim Yusuf, John A. Cairns, A. John Camm, Ernest L. Fallen, Bernard J. Gersh, 2011-09-07
