Multimodality John Bateman, Janina Wildfeuer, Tuomo Hiippala, 2017-04-10 This textbook provides the first foundational introduction to the practice of analysing multimodality covering the full breadth of media and situations in which multimodality needs to be a concern Readers learn via use cases how to approach any multimodal situation and to derive their own specifically tailored sets of methods for conducting and evaluating analyses Extensive references and critical discussion of existing approaches from many disciplines and in each of the multimodal domains addressed are provided The authors adopt a problem oriented perspective throughout showing how an appropriate foundation for understanding multimodality as a phenomenon can be used to derive strong methodological guidance for analysis as well as supporting the adoption and combination of appropriate theoretical tools Theoretical positions found in the literature are consequently always related back to the purposes of analysis rather than being promoted as valuable in their own right By these means the book establishes the necessary theoretical foundations to engage productively with today s increasingly complex combinations of multimodal artefacts and performances of all kinds

Interactions, Images and Texts Sigrid Norris, Carmen Daniela Maier, 2014-08-20 Multimodality is a fast growing interdisciplinary approach that aims to analyze the interplay of multiple modes such as gaze gesture or spoken language that are utilized in interaction and to examine the multimodal production and consumption of communicated messages This Reader provides a comprehensive text of current research into multimodality outlining in depth delineation of each primary theoretical and methodological approach as well as personal accounts of scholars who are responsible for the various

Drawing multimodality's bigger picture: Metalanguages and corpora for multimodal analyses Janina Wildfeuer,Claudia Lehmann,2024-07-30 Multimodality has most recently been described no longer as a research field or discipline on its own but rather as a stage of development within a field Bateman 2022a 49 The realization that 1 many different fields and disciplines now enter their own

multimodal phase with new interest in multimodal phenomena and that 2 these disciplines all commit to the development of multimodality research with their own theoretical principles and methodological tools brings with it not only an immense breadth of potential analytical objects but also many new meta methodological issues We need to find ways of combining insights from the variously imported theoretical and methodological backgrounds brought along by previous non multimodal stages of any contributing disciplines Bateman 2022a 49 At the same time the search for a meta methodology for multimodal analyses is pushed further by the recent trend towards more empirical approaches to multimodal phenomena and the development and use of larger multimodal corpora that just as well require theoretical and methodological refinements We need to develop ways of strengthening claims with robustly applicable methods which nevertheless remain firmly anchored theoretically Bateman 2022b 64 For a productive handling of these issues disciplinary triangulation and finding a common language or metalanguage Maton newest results from data collection methods and multimodal corpus analyses that expand the current quantitative work by e g applying existing theories and methods to larger datasets or exploring the newest communication technologies We are particularly interested in seeing how works addressing these aspects contribute to finding ways of productive triangulation and integration for and within a meta methodology for multimodality research This Research Topic aims to bring together scholars from a variety of disciplines interested in multimodality research to review explore and advance the contributions that John Bateman as one of the key figures in multimodality research has made to both theory and method building as well as to the driving forward of multimodal empirical and corpus analyses We welcome contributions that for example critically address the theoretical and methodological advancements that John Bateman has made with regard to the notions of semiotic mode discourse semantics genre textuality etc apply one of the many approaches that John Bateman has developed for the empirical analysis of multimodal artefacts e g the GeM model for page based documents his work on multimodal film and audio visual analysis and the discourse semantics and or annotation approach to visual narratives to larger corpora or currently newly developing communicative situations expand on one of the abovementioned aspects with new ideas and insights from disciplines that have not yet been included in multimodality research
