Ex absurdo sequitur quodlibet Dewoo, Moshumee Teena, Dewoo, Nerisha Yanee, 2015-05-10 Usually shunned condemned or narcotised as quickly as acknowledged the absurd remains nevertheless a large part of reality Loyal to their poetic pen Teena and Yanee Dewoo choose to embrace and transcribe a fragment thereof in this book in the manner in which it coloured their own thoughts or materialised around them in the past year in Mauritius as zealous objection to human existence as defined by Science or Religion and consequently as a sort of de stigmatisation of psychosis **Godfaring** Francis Clark, 2000 The author offers a searching discussion of the importance for Christian faith and life of the relation between the natural religion of humanity as reflected in different ways by all religions of the world and the revealed religion of Jesus Christ Francis Clark makes a significant contribution to the ongoing debate on the theology of religious pluralism **The Investigation of the Physical World** Giuliano Toraldo di Francia, 1981-05-29 Originally published in Italian in 1976 this book describes the methods scientists use to investigate the physical world It is ideal for students and teachers of science and the philosophy of science It is both a high level popularization and a critical appraisal of these methods describing important advances in physics and analyzing the historical development value reliability and philosophical implications of the way physicists approach the problems confronting them The introductory chapter on the meaning of physical theories and the mathematical tools used to develop them is followed by a general discussion on the foundations of physics under four major headings the physics of the reversible the physics of the irreversible microphysics and cosmology Throughout the subject matter of physical theories is linked to discussion of the attendant philosophical and epistemological implications such as the validity of the theories inductive inference causal explanation probability the role of observation and the reality of physical objects Semantics in Databases Leopoldo Bertossi, Gyula O.H.
