

## Informative Speech Outline

**General Purpose:** To Inform

**Specific Purpose:** At the end of my speech, my audience will understand the symptoms, causes, and ways to help people with dyslexia.

**Introduction:** (example- write the word “laugh” on the board) (pause) This is how normal people see and spell this word, however to a person that is dyslexic, it might appear to them like this (switch a & u to form luagh), or even like this (write luahg). According to an October 2011 article in The Age newspaper by journalist, Elisabeth Tarica, every 2 in 3 school children have dyslexia. As it is pretty likely that you will encounter a co-worker, friend, or even have a child with dyslexia someday, today I want to take a few minutes to share with you some of the symptoms and causes of dyslexia, as well as some tips on how to help people with the disorder.

**Transition:** The first step to helping someone with dyslexia is being able to recognize the symptoms a person is showing.

**Main Point 1:** The symptoms of dyslexia are usually pretty easy to spot, although it is usually easier to diagnose in school-aged kids. According to both the ADAM Medical Encyclopedia and the Dyslexia Action group, symptoms include:

1. Lower reading level/ slow reading rate.
2. Difficulty interpreting meaning in reading – hard time sequencing problems/ instructions
3. “bad” behavior, acting out caused by frustration. – The number of boys treated for dyslexia is three times that of girls treated for the disorder.

**Transition:** Now that you know what symptoms to look out for, it is often helpful to know what causes dyslexia when trying to help a person live with it.

**Main Point 2:** The causes of dyslexia are mostly internal factors, instead of external factors that cause diseases.

1. Heredity
2. As stated in the April 2009 edition of the Children Now magazine, dyslexia is characterized by Brain processing – doesn’t translate ‘symbols’
3. No help, feeling helpless, causes a person with dyslexia to be less likely to overcome.
