From Ducatus to Regnum Carl I. Hammer, 2007 Bavaria was a very important country during the early Middle Ages Its territory included much of the modern German state but also reached

across the Alps into what are now Austria and northern Italy Bavaria thus occupied a strategic position between the rival kingdoms of the Franks and the Langobards It was ruled by powerful dukes who had close political and personal relations with the Frankish rulers but who also vigorously resisted attempts to limit their own sovereignty Bavaria's independence was ended in 788 by Charlemagne who deposed his cousin Duke Tassilo Charlemagne's son the Emperor Louis the Pious then established Bavaria as the first monarchy east of the river Rhine for his own son Ludwig the German This is the first full study of the entire evolution of Bavarian rule from the mid sixth century into the early ninth century It explores the changing strategies adopted by its dukes and then its first king to establish their authority and maintain their autonomy in face of evolving challenges to their rule An Epilogue continues the story into the early tenth century

Carl I Hammer graduated from Amherst College B A and the University of Toronto Ph D and also studied at the universities of Munich Chicago and Oxford After a career in international business with Westinghouse and Daimler Benz he is now retired He has published two other scholarly books on early medieval Bavaria and numerous articles in academic journals in N America and Europe He lives in Pittsburgh

The Worlds of Medieval Europe Clifford R. Backman, 2009 Deftly written and beautifully illustrated The Worlds of Medieval Europe Second Edition presents a distinctive and nuanced portrayal of a western world that was sharply divided between its northern and southern aspects By integrating the histories of the Islamic and Byzantine worlds into the main narrative author Clifford R Backman offers an insightful detailed and often witty look at the continuum of interaction social cultural intellectual and commercial that existed among all three societies Filled with relevant primary documents this compelling volume surpasses traditional textbook representations of the Middle Ages by balancing the conventional focus on political affairs especially those of northern Europe with equally detailed attention to medieval society as it developed in the Mediterranean In addition Backman describes the ways in which the medieval Latin West attempted to understand the unified and rational structure of the human cosmos which they believed existed beneath the observable diversity and disorder of the world This effort to re create a human ordering of unity through diversity provides an essential key to understanding medieval Europe and the ways in which it regarded and reacted to the worlds around it Thoroughly updated and redesigned the second edition features an inviting and accessible layout and integrates captivating new illustrations nearly twice as many as in the previous edition to stimulate students engagement with the material Moreover it offers a sophisticated analysis of gender along with an intriguing examination of the tumultuous relationship between the Mediterranean and Islam An invaluable resource for both students and instructors The Worlds of Medieval Europe Second Edition is ideal for undergraduate courses in medieval history Western civilization the history of Christianity and Muslim Christian relations It also serves as an excellent supplement on the history of a specific country in the medieval period the history of medieval art or the history of the European economy
