Early Modern Cultures Of Translation:

Women and Early Modern Cultures of Translation Hilary Brown, 2022 *Women and Early Modern Cultures of Translation Beyond the Female Tradition* is a major new intervention in research on early modern translation and will be an essential point of reference for anyone interested in the history of women translators. Research on women translators has often focused on early modern England; the example of early modern England has been taken as the norm for the rest of the continent and has shaped research on gender and translation more generally. This book brings a new European perspective to the field by introducing the case of Germany. It draws attention to forty women who can be identified as translators in sixteenth and seventeenth century Germany and shows how their work does not fit easily into traditional narratives about marginalization and subversiveness. The study uses the example of Germany to argue against reading the work of translating women primarily through the lens of gender and to challenge claims about the existence of a female translation tradition which transcends the boundaries of time and place. Broadening our perspective to include Germany provides a more nuanced and informed account of the position of women within European translation cultures and forces us to rethink gender as a category of analysis in translation history. The book makes the case for a new woman interrogated approach to translation history to borrow a concept from Carol Maier and as such it will provide a blueprint for future work in the area. Early Modern Cultures of Translation Karen Newman, Jane Tylus, 2015-07-23. Would there have been a Renaissance without translation? Karen Newman and Jane Tylus ask in their Introduction to this wide ranging group of essays on the uses of translation in an era formative for the modern age. The early modern period saw cross cultural translation on a massive scale. Humanists negotiated status by means of their literary skills as translators of culturally prestigious Greek and Latin texts as teachers of those same languages and as purveyors of the new technologies for the dissemination of writing. Indeed with the emergence of new vernaculars and new literatures came a sense of the necessary interactions of languages in a moment that can truly be defined as after Babel. As they take their starting point from a wide range of primary sources—the poems of Louise Labé, the first Catalan dictionary, early printed versions of the Ptolemy world map, the King James Bible and Roger Williams's *Key to the Language of America*—the contributors to this volume provide a sense of the political, religious and cultural stakes for translators, their patrons and their readers. They also vividly show how the very instabilities engendered by unprecedented linguistic and technological change resulted in a far more capacious understanding of translation than what we have today. A genuinely interdisciplinary volume, *Early Modern Cultures of Translation* looks both east and west while at the same time telling a story that continues to the present about the slow, uncertain rise of English as a major European and eventually world language. Contributors: Gordon Braden, Peter Burke, Anne Coldiron, Line Cottegnies, Margaret Ferguson, Edith Grossman, Ann Rosalind Jones, L. Zl. Kontler, Jacques Lezra, Carla Nappi, Karen Newman, Katharina N. Hosington, 2018-07-28 This volume revisits Genette's definition of the printed book's liminal devices or paratexts as thresholds of interpretation by focussing specifically on translations produced in Britain in the early age of print 1473 1660 At a time when translation played a major role in shaping English and Scottish literary culture paratexts afforded translators and their printers a privileged space in which to advertise their activities display their social and ideological affiliations influence literary tastes and fashion Britain's representations of the cultural other Written by an international team of scholars of translation and material culture the ten essays in the volume examine the various material shapes textual forms and cultural uses of paratexts as markers and makers of cultural exchange in early modern Britain The collection will be of interest to scholars of early modern translation print and literary culture and more broadly to those studying the material and cultural aspects of text production and circulation in early modern Europe

Ideas Across Borders Gaby Mahlberg, Thomas Munck, 2024-02-20 Building on the historical study of cultural translation this volume brings together a range of case studies and fresh approaches to early modern intellectual history by scholars from across Europe reflecting on ideological and political change from c 1600 to 1840

Translations played a crucial role in the transmission of political ideas across linguistic and cultural borders in early modern Europe Yet intellectual historians have been slow to adopt the study of translations as an analytical tool for the understanding of such cultural transfers Recently a number of different approaches to transnational intellectual history have emerged allowing historians of early modern Europe to draw on work not just in translation studies literary studies conceptual history the history of political thought and the history of scholarship but also in the history of print and its significance for cultural transfer Thorough qualitative and quantitative analysis of texts in translation can place them more accurately in time and space This book provides a better understanding of the extent to which ideas crossed linguistic and cultural divides and how they were re shaped in the process Written in an accessible style this volume is aimed at scholars in cognate disciplines as well as at postgraduate students

Translation and Transposition in the Early Modern Period Karen Bennett, Rogério Miguel Puga, 2023-12-12 This volume makes an important contribution to the understanding of translation theory and practice in the Early Modern period focusing on the translation of knowledge literature and travel writing and examining discussions about the role of women and office of interpreter Over the course of the Early Modern period there was a dramatic shift in the way that translation was conceptualised a change that would have repercussions far beyond the world of letters At the beginning of the period translation was largely indistinguishable from other textual operations such as exegesis glossing paraphrase commentary or compilation and theorists did not yet think in terms of the binaries that would come to characterise modern translation theory Just how and when this shift occurred in actual translation practice is one of the topics explored in this volume through a series of case studies offering snapshots of translational activity in different times and places Overall the picture that emerges is of a translational practice that is still very flexible as source texts are creatively appropriated for new purposes whether pragmatic pedagogical or diversional across a range of genres from science and philosophy to literature travel writing and language teaching This book will be of value to those interested in Early Modern history linguistics and translation studies

The Body in Late Medieval and Early Modern Culture Darryll Grantley, Nina Taunton, 2000 Taking as its chronological starting point the female body of late medieval devotional literature the volume moves on to a consideration of the representation of gendered bodies in later literature It then proceeds to examine sixteenth century occupational orderings of the male body in education the civil service and the army and involves explorations into a variety of rituals for the purification ordering and disciplining of the flesh It includes enquiries into the miraculous royal body demon bodies the virtual body of satire and ends the late seventeenth century with dramatic representations of the diseased body and the grotesque bodies of travellers tales as signifiers of racial difference It pushes forward post modern notions of the body as a site for competing discourses It provides new dimensions to fantasies rituals and regulations in narratives fictions of the body as identifications of forms of knowledge unique to the early modern period Each of the essays sheds new light on how these late medieval and early modern narratives function to produce specialized

and discrete languages of the body that cannot be understood simply in terms say of religion philosophy or physiology but produce their own discrete forms of knowledge Thus the essays materially contribute to an understanding of the relationship between the body and spatial knowledge by giving new bearings on epistemologies built upon pre modern perceptions about bodily spaces and boundaries They address these issues by analysing forms of knowledge constructed through regulations of the body fantasies about extensions to the body and creations of bodily psychic intellectual and spiritual space The essays pose important questions about how these epistemologies offer different investments of knowledge into structures of power What constitutes these knowledges What are the politics of corporeal spaces In what forms of knowledge about spatial and bodily perceptions and practices are these early modern narratives embedded What ideologies shape and contain them The collection deliberately incorporates a period range which encompasses considerable cultural and ideological shifts that impact upon perceptions of the body The choice of essays in the volume recognizes both continuities and discontinuities between perceptions of the body in the medieval and early modern periods

Travel and Translation in the Early Modern Period ,2006-01-01 The relationship between travel and translation might seem obvious at first but to study it in earnest is to discover that it is at once intriguing and elusive Of course travelers translate in order to make sense of their new surroundings sometimes they must translate in order to put food on the table The relationship between these two human compulsions however goes much deeper than this What gets translated it seems is not merely the written or the spoken word but the very identity of the traveler These seventeen essays which treat not only such well known figures as Martin Luther Erasmus Shakespeare and Milton but also such lesser known figures as Konrad Gr nemberg Leo Africanus and Garcilaso de la Vega constitute the first survey of how this relationship manifests itself in the early modern period As such it should be of interest both to scholars who are studying theories of translation and to those who are studying hodoeporics or travel and the literature of travel
