Evolving Knowledge Bases Frontiers In Artificial Intelligence And Applications:

Evolving Knowledge Bases João Alexandre Leite, 2003 An Evolving Knowledge Base EKB is capable of self evolution by means of its internally specified behaviour In this thesis the author incrementally specifies semantically characterizes and illustrates with examples the concepts and tools necessary to the development of EKBs Information Modelling and Knowledge Bases XV Yasushi Kiyoki, 2004 This book will provide research communities in Europe and Japan with an overview of scientific results and experiences achieved using innovative methods and approaches in computer science and other disciplines which have a common interest in understanding and solving problems on information modelling and knowledge bases as Information Modelling and Knowledge Bases XIV H. Jaakkola, H. Kangassalo, E. Kawaguchi, B. Thalheim, 2003 This work includes the papers presented in the 12th European Japanese Conference on Information Modelling and Knowledge Bases Topics of research in this conference included the theory and practice of information modelling conceptual modelling and design and specification of information systems Cooperative Systems Design Françoise Darses, 2004 A recent conference brought together researchers who contribute to the design of cooperative systems and their integration into organizational settings The aim of the conference was to advance the understanding and modeling of collaborative work situations which are mediated by technological artefacts and to highlight the development of design methodologies for cooperative work analysis and cooperative systems design Papers from the conference reflect the multidisciplinary nature of this area representing fields such as computer and information sciences knowledge engineering distributed artificial intelligence organizational and management sciences and ergonomics There is no subject index Annotation 2004 Book News Inc Portland OR booknews com Software Engineering: Evolution and Emerging Technologies K. Zieliński, T. Szmuc, 2005-09-27 The capability to design quality software and implement modern information systems is at the core of economic growth in the 21st century This book aims to review and analyze software engineering technologies focusing on the evolution of design and implementation platforms as well as on novel computer systems Soft Computing Agents Vincenzo Loia, 2002 Annotation In the last thirty years the researchers involved in the design of smart systems have continuously provided methodologies and technologies to deal human and artificial behaviours The study of intelligent machines is attested by an enormous and growing literature and by a remarkable spin off in wide range of innovative projects Nevertheless these efforts intelligent based systems design still remain an open problem especially from a performances as well as complexity viewpoints Recent advances in networking technology and the ubiquity of the Internet open new perspectives in software application improvement This new scenario demands new paradigms to cope with computational models characterized by an unceasing dynamism strong decentralization and high unpredictability The exciting potential of agent technology has deeply marked these last years as a winning strategy to address the issues cited before Agents or Multi Agent Systems sketch intelligent behaviours by describing and managing computational activities

shared over communities of large grain entities Even though an agent owns a partial knowledge and a reduced deductive ability it may acquire wider competences thanks to rich interaction cooperation schemas It is clear that agent technology better fits the aspects of all those problems which can be depicted in terms of cooperating endeavours Soft Computing and in particular Fuzzy Technology may play an important role in the design of smart agents Promising benefits derive from well founded soft computing oriented approaches in order to better manage the behavioural models of the agents especially when the interactions occur in an environment characterized by imprecision uncertainty and partial truth The book intends to focus the contributions into three basic directions to present the state of the art in the development of soft computing based agents to examine the role of soft computing based technology in various facets of agent design problem solving autonomy adaptivity reactivity communication interaction to cross fertilize ideas on the soft computing perspective to the development of agent based intelligent information systems *Advances in Artificial Intelligence*, 2004 *Machine Reconstruction of Human Control Strategies* Dorian Šuc, 2003 Complex dynamic systems are usually controlled by operators who s skill is sub cognitive Therefore to reconstruct human control skill involves machine learning from operator s execution traces to induce a model of the operator s skill **Intelligent Condition Monitoring and Diagnosis Systems** Kesheng Wang, 2003 This work covers intelligent system development In order to survive in an uncertain environment it is necessary to bring artificial neural networks fuzzy logic systems genetic algorithms and expert systems together to make a condition monitoring and diagnosis system more reliable and cost effective than a traditional one The focus of intelligent condition monitoring and diagnosis system is on practical applications of intelligent techniques The text provides practicing engineers and scientists with the information they need to solve the problems in both industry and academia **New Trends in Software Methodologies, Tools and Techniques** Hamido Fujita, Paul Johannesson, 2003 **Annotation for the Semantic Web** Siegfried Handschuh, Steffen Staab, 2003 The Digital Library Approach Manual Annotations Wrapping Information Extraction Linguistics Graphics Usage of Annotations **Stochastic Models of Neural Networks** Claudio Turchetti, 2004 This book is intended to provide a treatment of the theory and applications of Stochastic Neural Networks that is networks able to learn random processes from experience on the basis of recent developments on this subject The mathematical frameworks on which the theory is founded embrace the approximation of non random functions as well as the theory of stochastic processes The networks so defined constitute an original and very promising model of human brain neural activity consistent with the need of learning from a stochastic environment Moreover the problem of speech modeling both for synthesis and recognition is faced as concrete and significant application in the field of artificial intelligence of the theory is presented *Information Modelling and Knowledge Bases*, 1996 *Computational Logic in Multi-agent Systems*, 2005-06 *Advances in Information Modelling and Knowledge Bases* Hannu Jaakkola, Hannu Kangassalo, Setsuo Ohsuga, 1991 □□□□□□□□□□□□□□ □□□□□□ □□□□□□□□ (Japan), 1972 *Information Modelling and Knowledge Bases* Bob Wielinga, Hannu Kangassalo, Setsuo
