Get a Grip on Your Money Larry Burkett, 1995-07 A course on managing personal finances designed for teens individual or classroom use Emphasis is on using principles in budgeting writing a resume and applying for a job [Get a Grip on Your Money - Student Text](#) Larry Burkett, 1990-02 In *The Coming Economic Earthquake* Moody Press Chicago 111 1991 Burkett delineated growing federal deficits and the ever increasing use of debt by business and households out of control Burkett points out those severe economic times will appear sometime shortly after the millennium unless current policies are changed Burkett believed that Keynesian economic policies with ideals for continuing federal deficits and the implicit preference for higher levels of credit and consumption reduced saving and a larger role for government in the economy are a means to disaster As Burkett states in the book that as interest on the debt consumes a larger and larger portion of the yearly federal budget and more money is borrowed each year to pay the interest on what was borrowed in previous years there will be a temptation to monetize the debt at an increasing rate leading to a calamity not seen since the Great Depression Burkett questioned whether or not elected leaders would take action in time to prevent fiscal chaos and believed they would not Larry gave no time line for this prediction other than a forewarning foreshadowing current events of the time with a little common sense added for good measure
